The Country Of The World

From our mountains to our coasts, across the vastness of our interesting land, we are driven by a desire of friendship which is also the cornerstone of the Commonwealth Spirit. This in turn has inspired our artists, fueled our growth, nourished our souls and shaped our culture.

Tracing its origins to the Mughal era, conceived in typical Jaipur style, amalgamating Persian motifs...

Featured above is 'Jhoomer', a turban ornament exemplifying the 'seamless friendship' essence of India.
Delhi 2010 Commonwealth Games Bid Committee

It is with a sense of great pride and overwhelming enthusiasm that we at the Indian Olympic Association lodge our bid for the XIX Commonwealth Games 2010.

Unprecedented, unparalleled and unbounded support from all levels of Governments - National, Regional & State as well as tremendous backing from the sports loving populations of India makes the lodging of this bid, even more significant.

The detailed execution of the Bid Document is based on the guidelines and specifications as laid down in the Constitution, Games Management Policies, Regulations and Code of Conduct of the Commonwealth Games Federation.

The Indian Olympic Association acknowledges and confirms that the Host Bid is being submitted to the CGF with the full knowledge, consent and enthusiastic support of the National Government and the Govt. of the National capital territory of the world renowned, candidate city of Delhi.

Besides the 15 sports suggested in our Bid Document, in the Teams Category, we would like to suggest the inclusion of Cricket & Basketball, subject to the approval of their International Federations Concerned and the CGF. We would be pleased to include any additional sports as approved by the CGF General Assembly.

We also take this opportunity to sincerely thank the Commonwealth Games Federation for this opportunity to showcase our wonderful land and its people and our great sports infrastructure and traditions.

2010. Great Games For Sure!

Delhi's past successes with international sporting events

It was as far back as 1951 that New Delhi and, indeed, India took the initiative to be at the forefront of the sports movement. The movement for the Asian Games got its forum with the historic city of Delhi when the first Asian Games were held here in 1951.

In 1982, 4595 participants from Asian countries converged once again to a newly-changed and modern city of Delhi hosting one of the sunniest sports in the world - the Jawaharlal Nehru Stadium. Ten world-class stadia, 13 new venues with state-of-the-art facilities and new and upgraded hotels and a public transport system were at the disposal of these participants. These existing facilities have since then been maintained very well and upgraded on a continuous basis.

If the Azad 1982 was the crowning jewel in Delhi's long history of organizing sports events, there is a long list of other Games & Meets hosted by Delhi which were acknowledged to be among the best to have organized.

What is truly remarkable about Delhi's tremendous success as a prospective host city is the efficiency, competence and ease with which it has organized a wide plethora of events, meets, exhibitions, fairs, conferences, summits, delegate missions... The city annually hosts the ITF attended by over 100,000 business visitors. Over the years, Delhi has hosted IT World '99 and Comdex India, which had over 70,000 business visitors. The largest auto show in this part of Asia, Auto Expo 2000 was also held in Delhi. Not only this, high level summits like the CHOGM and NAM have also experienced the Delhi warmth and organizational expertise.

The recent very successful visit of the US President where immaculate security, travel and accommodation arrangements were looked after by the state and the central Government proves the mettle of the city and its various Agencies.

Air-travel grant for accredited athletes and accompanying officials

The Bid Committee has offered a travel grant amount, 'the average figure on the basis of participation in the Manchester and Melbourne Commonwealth Games'.

Free Accommodation for accredited athletes and accompanying officials

The Indian Olympic Association has also offered free boarding and lodging facilities to accredited athletes and accompanying officials as per the CGF norms. A modern and swanky Games Village will be created for the athletes, while the senior members of CGF family will be housed in deluxe five-star hotels of Delhi and provided chauffeur driven luxury cars individually, alongside with cooks, drivers and ushers / escorts.

Free trip to Taj Mahal, one of the Seven Wonders of the World

The former US president Mr. Bill Clinton in his visit to India had said "the people living in the world can be divided in two categories - those who have seen the Taj and others who have not".

The Organising Committee will be glad to offer the participants and accompanying officials, a visit to this magnificent creation of mankind, free of cost.

A Special lane reserved for participants, on all major roads of Delhi

Delhi is expected to absorb a large number of visitors during the Games. To save participants from inconvenience, the Delhi Government has decided to reserve a lane for them on all major roads and construct over 50 flyovers by end-2006 to ensure smooth traffic flow. Already, 18 additional flyovers have been built, which are helping make traffic flow across the city, a smooth affair.

Health facilities

Delhi has 40,000 to 50,000 hospital beds. These are world-class Specialty and Super Specialty Hospitals in the capital. The Village will have its own medical centre fully equipped with latest state-of-the-art gadgets and trained & qualified personnel to provide medical aid round the clock.

Commitment from the Government

India is fully committed to the cause of the Commonwealth Games Spirit as is evident in the guarantees given by the Prime Minister of India and the Chief Minister of Government of National Capital of Delhi in their communications.
Together, We'll Make

The 2010 Games,
The Best!
Dear Mr. Fennell,

The Government of India has accorded its approval to the proposal of the Indian Olympic Association to bid for the 2010 Commonwealth Games to be hosted by the city of Delhi. Though India has been always keen but has not so far got an opportunity to host Commonwealth Games. The allotment of Games to India will give a big boost to sports not only in India but also in our entire region.

India is the founder of the Asian Games as well as the Asian Games Federation, now known as the Olympic Council of Asia. During the last five decades we have hosted numerous international Championships and Tournaments in various games and sports. Delhi has modern sports infrastructure which will be further strengthened by the Government if the Games are allotted to India. The entire sports infrastructure will be placed at the disposal of the Organising Committee, which will successfully organise the Games.

Government of India, therefore, undertake to support the Bid of the City of Delhi to host the Games, guarantee free entry to India of all accredited athletes and delegates of the participating countries and further guarantee that the Games will be organised in accordance with the constitution, protocols and regulations of the Commonwealth Games Federation.

I request you to please give the youth of India an opportunity to witness Commonwealth Games in their own country and to provide an opportunity to our ancient and world famous beautiful city of Delhi to play host to the Commonwealth Games Federation and athletes participating in the Games.

With regards,

Yours sincerely,

(VIKRAM VERMA)

Mr. Michael Fennell
Chairman

Dear Mr. Fennell,

I am writing to you to convey you the full support of the Congress Party for India’s bid for the 2010 Commonwealth Games at Delhi.

Delhi has a proud sporting tradition and heritage as well as world class facilities. All of Delhi’s citizen’s would be honoured and pleased to host the 2010 Games. Please be assured that the City of Delhi and its people are united behind this bid.

The Congress Party looks forward to your favourable consideration and response to this request for providing Delhi an opportunity to host the 2010 Games.

With good wishes,

Yours sincerely,

(Sonia Gandhi)

Sub: Bid Document for the 2010 Commonwealth Games

Dear Mr. Fennell,

I have the honour to submit the Bid of the Indian Olympic Association for hosting the XIX Commonwealth Games in 2010 in Delhi.

All the documents have been completed as per the requirements as enunciated in the CGF Constitution and the invitation to Bid and other relevant guidelines.

The Govt. of India and the city of Delhi have agreed to cooperate with the CGF and the Indian Olympic Association to establish and comply with the joint marketing programme as laid down in the guide lines and more specifically, in the Host City Contract.

I take this opportunity to promise the CGF and member Countries that Delhi will deliver the best Commonwealth Games ever.

With personal regards,

Yours sincerely,
(SURESH KALANIDHI)
President

Mr. Michael Fennell,

14th May, 2003

My dear Mr. Fennell,

I am glad that the Indian Olympic Association is making a bid to host the 2010 Commonwealth Games in Delhi.

Delhi is a unique city, built with the sources of myth and tradition and the essence of modernity. It has centuries of subcontinental history, from the ancient to the contemporary. As the capital city of India, it reflects the country’s diverse, pluralistic and cosmopolitan composition. It is a city inspired by its history, while remaining open to innovation and modernity. It has good hotels and amenities for visitors. In recent years, Delhi has hosted major international events, including the Commonwealth Heads of Government Meeting, the summit-level meeting of the Non-Aligned Movement and, most recently, the 8th Conference of the Parties to the UN Framework Convention on Climate Change.

Delhi had hosted the first Asian Games, followed by the 5th Asian Games. The excellent available sports infrastructure in the city has been maintained in good shape and will be further augmented for the Commonwealth Games. Besides, we have set aside land for building a brand new Games Village, as also the new well equipped indoor stadium. The Government of the National Capital Territory of Delhi is fully committed to providing all the necessary support to the Organising Committee in successfully hosting the Games.

It will give us the greatest pleasure to welcome the Commonwealth fraternity and sports persons to our city. I am, therefore, writing to request you and the Commonwealth Games Federation to consider favourably Delhi’s bid to host the Commonwealth Games.

With my best regards,

Yours sincerely,
(Vijai Kapoor)

May 20, 2003

Dear Shri Suresh Kalmadi ji,

I am happy to learn that Indian Olympic Association is bidding to host 2010 Commonwealth Games in Delhi.

The Central Government and Sports Authority of India would focus their attention to make the games a grand success. In this respect the All India Council of Sports and entire sports fraternity of country would be happy to host the games and lend full support to the proposal of the Indian Olympic Association to Bid to stage the games.

(YVJAY KUMAR MALHOTRA)

Shri Suresh Kalmadi
Member of Parliament, President, Indian Olympic Association, Jawaharlal Nehru Stadium, New Delhi.

Ofice: Jawaharlal Nehru Stadium, Lodhi Road, New Delhi-110003, Ph: (O) 2439956, 2439840, (R) 23315070, 23315071 Fax: 23315045

Dear Suresh ji,

I have your letter of March 13, 2003 conveying the decision of Government of India in principle for hosting of the 2010 Commonwealth Games in Delhi by the Indian Olympic Association.

I am happy to note that the Olympic Association is readying to bid by May 2003 to the Commonwealth Games Federation for allotment of Games 2010 in Delhi.

I wish to convey that the Government of Delhi welcomes the step and will extend all possible support for holding of the Commonwealth Games 2010.

With regards,

Yours Sincerely,

SHEILA DIKSHIT

Shri Suresh Kalmadi, M.P., President, Indian Olympic Association, Jawaharlal Nehru Stadium, New Delhi-110003.
04th April, 2003

Dear Shri Kalnadi,

I am in receipt of your letter No. 10/4/BHD-2010/CGM/MCD dated 15.5.2003 regarding 2010 Commonwealth Games. The Municipal Corporation of Delhi shall be extremely keen to provide all assistance in case the Indian Olympic Association is selected for holding the 2010 Commonwealth Games in Delhi. In the past also, the Municipal Corporation of Delhi had actively participated in the preparation of the 1982 Asian Games. It shall be our endeavour to provide full support if 2010 Commonwealth Games are hosted in Delhi.

With regards,

Yours Sincerely,

Jaishree Patwari
(Mayor - Delhi)

Sports Programme

△ A total of 15 sports (12 Individual and 03 Team events) are scheduled to be held.

Games Village
△ 100 hectare site
△ State-of-the-art medium density urban design
△ 8,500 beds, 1,875 bathrooms
△ High level of athlete comfort. International Zone and Residential Zone
△ About 20 minutes to major venues

Transport
△ Existing public transport system will comfortably cater for spectators, visitors.
△ Dedicated bus service (professional drivers) for athletes and team officials.
△ Totally eco-friendly fleet running on CNG fuel and/or batteries.
△ Specific fleets will be provided as per the rules, regulations & protocols as specified in Regulation 2 of the CGF constitution.
△ Delhi’s Metro Rail will have completed 2nd Phase by 2010 with a network of more than 110 kms.

Delhi Airport
△ Rated best in India and in top five in the region.
△ Open 24 hours, handles all aircraft types.
△ VIP facilities will be provided and fast-track Customs procedures introduced.
△ Travel time to the Village approx. 40 minutes.
△ Immigration procedures will be processed on-line by them.
△ Likely that all athletes/team officials/Games family accreditation may be received in advance.
△ Charter aircraft facilities available at Delhi, Mumbai, and all major airports.

Security
△ Security will be the responsibility of the Home Ministry, Central Government of India and executed by Delhi Police.
△ 25-day Delhi Police presence at all venues with interface to venue security.
△ 25 days / 24-hours per day Delhi Police + Special Task Force presence at the Games Village.
Bid Specification

Environment
- Climate during the event is conducive to peak athletic performance.
- Delhi is known for the quality of its air, water, and food.
- Delhi has an extensive network of parks and gardens. It is one of the greenest capitals in the world.

Entertainment
- Opening & Closing ceremonies will be elaborately staged, gala, planned and orchestrated events, which will be held at the Jawaharlal Nehru Stadium.
- Nightly cultural and arts events will be held at several venues in the Games Village as well as close to the CGF members' hotel places of accommodation.

Government Services
- Memorandum of Understanding with National, State and Local Government for the provision of required Government services have been prepared and will be entered into once the Games are allotted to Delhi.
- The majority of Govt. services are provided free of cost in normal routine, and as such will not be reflected in the budgets. Additional expenditures incurred specifically for the conduct of Games would only be reflected.

India is today not only the world’s second largest and a stable democracy but also the second-most populous nation in the world, home to nearly 15% of the world’s population.

In the region, right from its independence, India has been at the forefront of sports and also education, science, technology and human rights for all, especially its youth.

Nearly 50% of India’s massive population is in the age group of 14 to 35 years which will form a major portion of the country’s citizens tomorrow. To build up a strong nation, their mental and physical fitness is of paramount importance. Sports & Games propagated at the highest levels have a miraculous capacity to percolate even to the grass roots and also achieve the widest coverage.

To make Sports & Games a part of Indian daily lives, the Indian Olympic Association has chalked out a four-pronged strategy. This involves:

- Spreading awareness and the message of sports across the length & breadth of the country.
- Planning and creating sports infrastructure that incorporates the latest equipment and facilities. These would be created at the national, regional and right up to the local community level.
- Access and make available at all levels, modern sports science and technologies and incorporate latest techniques & technologies.
- Ensure financial support, funding and financial commitment from Governmental as well as Non-Governmental Organisations.
The 2010 Games And Beyond. A Sports Vision For The Youth.

India comes together as one single entity to commit itself whole-heartedly and completely to spreading the message of sports and upholding the spirit of Commonwealth. India and Delhi dedicate themselves to making the 2010 Commonwealth Games the finest ever held...one that will inspire goodwill, friendship, and unity.

The Commonwealth Games may have had their origins years ago, but the spirit is all about youth, about hope and friendship. India, which has welcomed the world with open arms for 2010, dedicates itself to strengthening further the spirit of friendship and understanding in the world, especially among the citizens of tomorrow.

It is the youth who have to carry the spirit of Commonwealth further beyond tomorrow and, beyond boundaries...to create and forge bonds of friendship. It is to these youth that India is committed. The 2010 Commonwealth Games are one of the first few significant steps in the journey that Delhi and India are embarking upon.

Building Upon Tomorrow’s Vision... Today!

Since 1951, when India stepped into the center-stage of the world sports arena, Indian participation in all international events has been consistent, remarkable, and exemplary. Commonwealth Games, not to mention the Asian Games, the Olympics as well as all other Regional Games have seen participation of Indian sports persons with the highest degree of dedication.

To say that sports are firmly on the National Agenda with the utmost backing of the Government would only be an understatement.

The Honorable President of the Republic of India had this to say while addressing the Joint Session of the Parliament, the highest legislative body of the country, for the year 2003:

"The Ministry of Youth Affairs & Sports has finalized a new draft National Youth Policy. A National Youth Commission has been set up. Indian sportspersons deserve commendation on their spectacular performance in the 17th Commonwealth Games and 14th Asian Games. The decision to host the first ever Afro-Asian Games later this year will further promote sports in the country. I call upon our promising sportspersons and sports organizations to start preparing in full swing for the Olympics next year. Honourable Members, let us send our best wishes to the Indian Cricket Team playing in the World Cup tournament in South Africa."
The National Sports Policy...  
A Blueprint For The Champions Of The Future.

The Preamble of The National Sports Policy for 2001, a Governmental Initiative that is reviewed & restructured every 5 years, states:

“Activities relating to Sports and Physical Education are essential components of human resource development, helping to promote good health, comradeship and a spirit of friendly competition, which, in turn, has positive impact on the overall development of personality of the youth. Excellence in Sports enhances the sense of achievement, national pride and patriotism. Sports also provide beneficial recreation, improve productivity and foster social harmony and discipline.”

A brief look at some of the highlights of the National Sports Policy will reveal the extent of commitment of the Government to ensure that Sports are an integral part of every Indian’s daily life and how the Champions of the future are being sought to be shaped today itself.

“In terms of the National Sports Policy, 2001, the Central Government, in conjunction with the State Government, the Olympic Association (IOA) and the National Sports Federations will concurrently pursue the twin objectives of “Broad-basing” of sports and “Achieving Excellence in sports at the National and International levels”. Sports activities, in which the country has potential strength and competitive advantage, need to be vigorously promoted. Towards this end, sports and physical education would be integrated more effectively with the education curriculum”.

Every school, institution, college and university is expected to promote not only excellence in academics but promote sports from the junior-most class, so that a sports culture is in-built into each and every Indian child and youth.

“Considering the key role of sports in national life and for inculcating national pride in the younger generation, the objective of broad-basing that is, universalisation or mass participation in sports assumes special significance. It is imperative to ensure that the educational institutions, Schools and Colleges in both rural and urban areas; the Panchayati Raj Institutions, Local Bodies, the government machinery, the Sports Associations and Industrial Undertakings, as also the various Youth and Sports Clubs, including those of the Nehru Yuva Kendra Sangathan (NYKS) throughout the country are, and remain, fully associated with this programme. Efforts will be made to promote and encourage women’s participation in sports. The Union and State Governments, as well as the Sports Federations/Associations will endeavour to promote a club culture for the speedy development of sports in the country”.

“The integration of Sports and Physical Education with the education curriculum, making it a compulsory subject of learning up to the Secondary School level and incorporating the same in the evaluation system of the student, will be actively pursued. A National Fitness Programme would be introduced in all Schools in the country, and steps initiated to augment the availability of infrastructure, including play fields/sports equipment and action taken to provide physical education teachers in educational institutions through, inter-alia, the training of selected teachers in these disciplines. Specialized sports schools may also be set up. An appropriate Inter-school and Inter-College/University competition structure would be introduced at the National, State and District levels”.

Rewarding excellence is the only way to ensure that the finest from the country get the best the world has to offer.

“The IOA and the State Governments would also accord higher priority to such disciplines. In planning the development of various disciplines, the genetic and geographical variations within the country would be taken into account so that in areas of potential, in particular disciplines, timely steps may be taken to harness the existing and emerging talent. Centres of excellence will be set up to identify and train outstanding sportspersons including sports academies where young and talented sports persons will be groomed to achieve higher-levels of performance in the international sports arena.”

International Competitions have been acknowledged to be a perfect vehicle to hone the country’s talent potential into world champions.

“Acknowledging the importance of National Championships for developing competitive spirit and for talent-scouting, it would be incumbent on the federations/Associations to hold Annual Championships in various
disciplines in all categories, viz. seniors, juniors and sub-juniors (for both men & women) at the District, State and National levels. Each National federation would draw up the Annual National Calendar of these events sufficiently in advance, every year, which would be compiled and published by the IOA. Greater emphasis will be placed on promoting the development of sports amongst them identified for special training and support.

Effective participation in international events, especially the Olympics, Asian and Commonwealth Games, is a matter of national prestige. Participating in these events has, so far, largely been restricted to those disciplines in which creditable performance is anticipated. The contingents to represent the country in such events need to be chosen in due time, in the light of performance and promise, in National Championships and elsewhere. Long Term Development Plans (LTDPs) will be prepared for each Sports discipline, incorporating details of standard of performance, targeted levels of performance, participation in competitions at national and international levels, sports exchanges, scientific support and the holding of international competitions in the country. The implementation of the LTDPs will be reviewed periodically and the same would be continued, as a rolling plan year after year. The release of Government assistance would be considered on the basis of performance relating to the LTDP in question.

Inculcation of science, technologies and scientific temper into the arena of sports is one of the corner stones on which the National Sports Policy foresees its future success.

The significance of scientific back-up to sport stands well established. Accordingly, action will be initiated to strengthen this area, in accordance with international standards. Experts would be associated with each sports discipline or groups of sports disciplines, on a continuing basis, to provide the requisite support in terms of nutrition, psychology, medicine, pharmacology, physiology, biomechanics and anthropometrics as well as other branches of sports sciences. Suitable mechanisms would be introduced to achieve co-ordination between the laboratory and the field, that is, between the coaches and the sports scientists, and particular care taken to ensure nutritional support to talented sports persons and to sustain their mental health and competitive spirit.

"Training and development of coaches, sports scientists judges, referees and umpires"

"As a resurgent India confidently enters the New Millennium, sports and related activities will be increasingly utilized as a medium for promoting cooperation and friendship in the region, as also globally. Sports exchange programmes will be pursued with all friendly nationals, with emphasis, on the one hand on advanced training for sports persons and coaches, scientific support, the latest research aids and development of infrastructure, and earning laurels for the country, in sports and games, on the other."

"..."
Legacy of the Games

Perhaps one of the most enduring legacies of sports is the spirit of friendship, a coming together of diverse cultures and multiple-visions on a singular platform. A message that through effort, hard-work and dedication lifelong friendships can be built and nurtured.

When India initiated the Asian Games movement in 1951, it also sparked a movement to further strengthen the bonds of understanding among the peoples of this part of the world. Equally momentous was the fact that with this movement, India a new series of sports infrastructure was created in concrete on the ground and as a future plan to guide the country, on the drawing boards.

The second significant and major addition to sports infrastructure was occasioned by the 1982 Asian Games. The city-line of the city under went a major metamorphosis.

Along with the spires and heritage buildings piercing the skyline, rose gargantuan structures, the modern arenas of fierce yet friendly sporting contests, where men & women from 33 Asian countries competed for “The Honour Of Their Country And The Glory Of Sport.”

Not Just Sports... A Legacy Of All-round Development.

Along with the swanks, state-of-the-art sports facilities & infrastructure, the IX Asian Games triggered a spate of growth & development that benefited even the common man on the street.

On the environmental front, all the five units of the Indraprastha Power Station, for the first time, had air-pollution control equipment. More than four lakh trees were planted, which were kept free of traffic fume discolouration and disease, by special spray-washing equipment.

All archaeological monuments were spruced up. Giving the people a gentle glimpse into the rich and varied cultural heritage they had inherited.

Power-distribution also got a shot in the arm. An additional 60 megawatts of power were available to Delhi for the Games, and now remain a permanent asset. Add to this, fifteen power sub-stations for better distribution, and the benefits become lightning.

The improvement on the surface-transport front, was even more dramatic. Delhi got seven new flyovers and four were equipped with high-mast lighting. Two hundred and ninety kilometers of newly widened roads - fifty re-designed intersections with sodium vapour lighting and the development of nineteen areas, for coordinated movement by road and rail was part of the Games effort. A crop of new Service depots for UTC - 290 new buses, plus 200 new coaches sporting Asian 62 colours from the MSRTC; (Maharashtra State Road Transport Corporation) - 65 additional tourist cars, 200 additional taxis, and 150 additional micro-buses, were other assets created by the IX Asian Games.

Water, received a high-priority. Delhi received an additional fifteen million gallons of water a day when the Ganga-Yamuna link was completed.
The Tourist, who, in the past, had problems finding suitable accommodation, was another Asian beneficiary. Arriving here were 3,500 new rooms available in one-star to five-star hotels. Paying guest accommodation, another 3,500 beds, here, comfort, a taste of Indian culture and hospitality, were happily together.

A new International Departure and Arrival Hall at Delhi Airport speeded up the whole process of the tourist's discovery of India. Communication facilities also reached a new summit. The IX Asian Games gave birth to colour Television in India. In addition, there were many additional telephone lines and exchanges. 150 km of cable to hotels and studios were laid in addition to 12,000 plus lines. Another 60 Public Call Offices and an Electronic PABX, for the first time, in several studios were available at the newly constructed hotels.

The IX Asian Games dramatically altered the skyline of Delhi. The Jawaharlal Nehru Stadium, with a seating capacity of 75,000; the Indraprastha Indoor Stadium, with a seating capacity of 25,000, with the third largest dome in the world; the Velodrome; the Talkatora Swimming Stadium; the Lajpatnagar Shooting Range, are some of the architectural gems that were constructed in record time and from scratch.
We Have All It Takes

To Make The 2010 Games, Truly Remarkable.
Organising Committee

Future Organising Committee:
1. Should your bid to host the Commonwealth Games be successful how would the Organising Committee be structured? Please include an organisational chart including details of the proposed relationship with the CGF and the local CGA.
2. In addition please provide details of your proposed Committee structure including brief biographies of the key figures together with their previous experience in organising similar events along with staff plans and an outline of your volunteer programme.
3. Specify which public or private organisations or bodies would be represented on your Organising Committee and their respective level of authority.

Governmental:
1. What level of support has been provided towards your bid and also the hosting of the Commonwealth Games through various levels of Government e.g. National, Regional and Local Government?

- The Organising Committee (OC) will be a non-profit Government-owned Registered Society. Draft constitutions are currently under preparation and will be finalised by the second half of 2004.
- The Society (Organising Committee) will have a Board of Directors, which consist of four Government representatives, and three Indian Olympic Association representatives.
- All levels of management of the organising committee will finally report to the Board.
- Staffing of the organising committee will be done in 4 phases, which have been earmarked separately depending upon needs & requirements.
- The number of Volunteers expected to be taken up are around 18,000.
- The IOA has a MOU with the Confederation of Indian Industry (CII) - India’s apex industry body with a direct membership of 4,000 Indian companies, who have each been associated with the IOA and the Indian Games. An agreement has been signed with the CII to support the IOA’s bid for the 2010 Commonwealth Games.
- The Prime Minister of India, the highest elected office of the country, has pledged his and his Government’s full fledged support to Delhi’s bid for the 2010 Commonwealth Games.
- The leader of the Opposition in Parliament, in her letter, has also endorsed the Indian bid.
- The Lieutenant Governor and Chief Minister of the State of Delhi have also endorsed their support to the bid.

It is envisaged that the Organising Committee will depend heavily upon and draw upon knowledge from the Commonwealth Management Programme. In addition it will use its basic foundation, knowledge, skills and resources as developed by the Bid organisation. The Indian Olympic Association (IOA). The IOA has over the past five decades developed extensive skills, specialisation and experience of conducting Games on an international level. Hence it makes for prudent sense to continue with this experienced team, which has already planned, created and worked to produce Bid Document. At this point in time it is envisaged that the Organising Committees’ draft Constitution will be finalised by mid 2004. The proposed legal status is a non-profit registered Society. This structure and Committee members will be in place by end 2004.

The Executive Board of the Organising Committee will be headed by a Chairman who will be a Govt. Nominee. Three Members of Commonwealth Games Federation as per Clause 31 of Protocol 2. will be a part of the Board. Members will be selected taking into consideration the identified functional responsibilities of Marketing & Communication, Finance & Administration, and Event Management.

There is a large base of experienced people to draw from, who have been associated with organising international events of this magnitude.

Organising Committee

Phase 1 PLAN
The management philosophy during this phase will be to set up a framework of systems and infrastructure and provide accurate cost estimates for all resource requirements for the 7.7 year period of the Games.

Phase 2 CREATE
This Phase involves building on the foundations established in Phase 1 through a further expansion of the functional areas.
During this Phase, the resources will be driven by a centralized focus allocated specifically to individual department areas.

Phase 3 DELIVER
The organisation will become refocused on a venue delivery model. As such, the organisation will undertake a complete restructure to re-allocate the appropriate resources from each of its key departments, i.e. Marketing & Communication, Finance & Administration, etc to individual Venue Teams.

Phase 4 CONCLUDE
It will be principally a period of reconciliation of plans, strategies, commitments and budgets and an evaluation of outcomes and results. It will be a time of recouping, reporting and archiving.

The chart below depicts the four phases involved in setting up the Organising Committee. This is followed by a specific organisation chart for each of the four phases in the life of the organisation.

- **Phase 1 Plan**
  - January 2004
  - May 2006

- **Phase 2 Create**
  - May 2006

- **Phase 3 Deliver**
  - December 2010

- **Phase 4 Conclude**
  - March 2011
The volunteer programme has been split into three segments:

i) Recruitment

It is estimated that 18,000 volunteers will be required to undertake a wide range of tasks, prior to, during & after the games.

All volunteers will be expected to attend 26 hours of training and debriefing and would be asked to provide over 80 hours of service. Professionally accredited individuals or organizations will carry out training.

In recognition of their valuable contribution all volunteers will receive a certificate of service, a souvenir medal/lion, and a special post-event party to be given in their honour.

ii) The Volunteer Training

The Volunteer Training programme will be managed by volunteer managers and Co-ordinators who will be Government second mates.

The generic training programme will include introductory first aid/CPR, cultural training, Games orientation and customer service (meet and greet). The office of training and further education will carry out this training.

The programme will also include job specific training. Staff of the Organising Committee will carry out this element.

iii) Government Secondment Programme

Volunteer Managers and Volunteer Co-ordinators will be sourced from within Government ranks to run the Volunteer Programme.

- Managers will receive six weeks training
- Volunteer Coordinators will receive three weeks training
Please attach a Map of the City showing in particular the following, and
starting whether complete, under construction or proposed:

1) Cannes Village for Athletes
2) Cannes Headquarters
3) Accreditation Centre
4) Press Centre
5) Telecommunication Centre
6) Lodging for the
7) CGF Group
8) Lodging for Technical Officials
9) Lodging for News Media
10) Competition sites and facilities
11) Training Areas
12) Airport
13) Railway Station
14) Major International Hotels

△ India, the world’s largest peninsula is also one of the world’s
oldest civilizations. Covering over 3 million sq. kilometers, the
country offers a rich geographical diversity, and some truly
remarkable histories within its folds. Making it a favourite tourist
destination.

△ Delhi, the capital and state city is easily the favourite gateway to
India and is also the second largest city.

△ Known for its green covers, the city has played host to several
international events and is truly a metropolitan metropolis.

△ All major Cannes facilities either exist or would be created by
2007, except for the Cannes Village.
The Indian Tradition Of Warm Hospitality
And Treating Guests As Gods
Is As Old As Time Itself. India Extends A Warm Invitation
To The Commonwealth World To Visit Delhi
For Great Games For Sure.

India is one of the world's oldest civilizations. A synthesis of
many cultures, possessing a rich and varied heritage, the country is a
crucible of many different communities, each preserving its religious
identity and finding its own piece in the larger canvas called India. India
is a country that has not only professed but also practiced the doctrine of
religious tolerance through the centuries.

From its crown of the majestic Himalayas, down to the tropical rain
forests of the south, India is a picturesque country endowed with an
extraordinary and unique natural beauty. It extends over an area of
3.23 million square kilometers and is ranked as the seventh largest
country in the world. India stands apart from the rest of Asia, marked off
as it is by mountains and sea. This gives the country a distinct
geographical identity.

Situated entirely in the northern hemisphere, the mainland
extends between latitudes 8°40' and 37°6' north and longitudes 68°7' and
97°24' east. It measures 3,217 km from north to south between the
extreme latitudes and 2,933 km from east to west between the
extreme longitudes. India has a land frontier of about 15,200 km and the
total length of the coastline of the mainland, Lakshadweep islands and
Andaman and Nicobar Islands is 7,516 kilometers.

Within India's geographical vastness dwells a population of over
one billion human beings. In fact, India ranks next only to China as the
most populous country. Home to nearly 16 percent of the world’s
population, India is a sovereign, socialist, secular, democratic and
deliberative parliamentary system of government.

Ever since its independence in 1947 the country has maintained
political stability and territorial integrity with notable economic and
social development. India has emerged as a nuclear power. Today, it has
achieved a high standing in the development of space science and Information
Technology, easily being recognized as one of the most capable software
developing centres in the world. Indian IT professionals are in fact at the
head of the software movement across the world. It has embarked on a
course of economic liberalization and globalization and has
consequently become a popular destination for well-known multinational companies who are world leaders in their industry.

Regional disparities in social and economic growth are on the
decline. The standard of living of the common man is rising. Individual
liberties and rights are zealously safeguarded. Despite its physical size as a continent and its diverse social and religious composition as a
multi-ethnic and diverse society, there is no discrimination against any
Indian of India on the grounds of caste, creed, religion or sex. Today
India stands as a beacon of diversity, a country that has embraced
beings of every race, nationality, religion and creed with open arms and a
warm heart.

The Constitution of India offers all citizens, individually &
collectively basic freedom. These are guaranteed in the form of six broad
categories of fundamental rights. The Fundamental Duties as
enunciated in the constitution remind upon a citizen and are,
timeless: "...to promote harmony and the spirit of brotherhood amongst all
people of India transcending religious, linguistic, regional & sectional
diversities."
India: Not Just A Destination, An Enchanting Experience

Almost the size of Western Europe, the country of India is in actuality several nations rolled into one tantalizing kaleidoscope of rich history and astonishing geography. The canvas of geographical diversity is enormous as it is surprising. Every hundred kilometers the landscape takes on new hues, the glimpses into history open new vistas, the dialect takes on new forms... and even the costumes differ.

The best Of all the worlds. In one Place!

Show-capped mountains glinting in the early morning... burning sands for as far the eye can see... dense virgin rainforests sheltering within their folds an entire new world of flora & fauna... sun-kissed tranquil beaches... as a tourist destination, India has few parallels.

From Wildlife To Concrete Jungles... Choose Your Destination.

Apart from being home to a billion people, India is also home to some of the most exotic and exciting wild-life. Carefully nurtured and jealously guarded, this wildlife in their natural setting is perhaps one of those sights rarely experienced and never forgotten.

At the other end of the spectrum are the world’s best and finest hotel chains offering every conceivable luxury. Coupled with the traditional India hospitality and warmth that comes from the heart... it makes for an experience rarely seen in any other part of the world.

Earth, Water, Wind & Sky... Choose Your Companion.

Adventure. Excitement. Exhilaration. Ecstasy. Experience them the way you want to.

Explore native forests. Step out on some of the most fascinating mountain-treks. Slide down a few of the most picturesque snow slopes. Catch your breath on surf-kissed beaches. Relax with a tall glass overlooking the most photographed monument in the world, the Taj Mahal.

Only in India you get it all.
Experience.
Feel.
Explore. Enjoy.
In so many ways.
India, Indeed
Delhi Is Literally
At The Heart
Of The
Commonwealth
World.
A City That's Home To The World.
A Perfect Blend Of A Glorious Past
And A Vibrant Future.
The Seat Of The Fastest Growing Economy's Engine.

Delhi.
It's where
The world
Is at home.

The World In A City.
One of the world's oldest living cities... conquerors have fallen in love with it, marauders have plundered it and kings and princes have pampered it. A city that has held its own - in the past and even today in the 21st century. Where age-old monuments rub shoulders with modern chrome-and-glass skyscrapers. Where mouse-clicks enticingly co-exist with horse-cart clips.

Where The People Of The World Belong.
A multi-cultural, multi-ethnic and multi-lingual metropolis, Delhi speaks many languages. Migrants from any part of the world can find a bit of their country nesting within the folds of this bustling metropolis. A ballet troupe from Russia, the fiery traditional cuisine of Australia, typical English muffins with tea, or the strains of the tradition Moroccan music, ... you'll find it all in Delhi. Yes, it is not without reason that in Delhi, the world is at home.

A Buffet Of The World's Finest & Exotic
Delhi is truly a gourmet's dream come true. The Rajas and Emperors who ruled the city centuries ago, have left their indelible mark on the cuisine of the city. The result is that the city offers a potpourri of some of the most interesting and exotic cuisines from across the shores. From the traditional succulent kebabs of India to even caviar from Russia... the food-lover can literally set sail for a world food-tour in Delhi. From the French to the Mexican, Chinese to Lebanese and every thing in between... food is available in plenty and is affordable enough to suit every budget with a consistency of high quality.

Songs Of Joy In Myriad Tongues
From Arabic and African to Persian and French and any other language that one may think of... Delhi boasts of a school, department, or a linguistic training college for almost every language spoken in the world.

Despite Hindi... being the mother tongue for a majority, English is not only spoken but well understood by a vast majority of the citizens.

The city lives and breathes a youthful spirited sense of salubriousness, from exquisite cultural performances to street plays, from international film festivals to classical vocal performances, Delhi's cultural and entertainment scene is truly composite.
Where Gentle Glimpses Into History Also Reveal The Future

Home to some of the most powerful dynasties and empires in history... Delhi today leads the country’s progress charting our new vistas in globalisation and economic growth for this mammoth country of over one billion.

Only in Delhi will you find ancient time-defying monuments round the corner from some of the plushest and swankiest corporate business centers. Where huge, landscaped gardens created by Emperors of yore suddenly give way to air-conditioned glitzy shopping malls. Where in the shadows of history, software engineers process and send data across to the corners of the world, over modern state-of-the-art equipment and media.

Delhi... Where the past is just as exciting as the unfolding future.

Where A World Of Adventure & Thrills Awaits.

In just five hours flat you can be transported from the concrete jungle into the world of wildlife and sanctuaries. Where fascinating wildlife co-exists with exotic flora. The land of the legendary man-eater hunter Jim Corbett... a wilderness of untouched splendours populated by wildlife is literally next door to Delhi.
Where Future Lives Are Shaped By The Finest

Delhi boasts of as many as five universities and over 2800 educational institutions, colleges and schools. The city is also home to the famed IIT Delhi, a beacon of learning and education. Alumni from these universities today head some of the largest business and corporate houses not only in India, but also across the world.

The city's colleges and research departments have an enrollment, which is in excess of 600,000. Future engineers, scientists, doctors and physicists... they represent the Delhi of today & tomorrow. Young, vibrant, lively. And ready for the future.

Climate

Data On Climate (for the period of the Games, based on the last 10 years)

- Temperature (24 hours)
  - Average Max :
  - Average Min :
- Rainfall
- Relative Humidity (Daily Average)
- Any other general information on climate.

△ Delhi is located in the northern part of India, in the Northern Hemisphere.
△ February, March, October & November are the most pleasant months. When this capital city hums with the tourist rush of both national and international origin.
△ October & November, the proposed months recommended for holding the Games are typically months of pleasant weather, soft sunshine, cooling breezes and dry climate - ideal for peak athlete performance and encouraging spectator participation.

Delhi Weather

It is recommended that the 2010 Commonwealth Games be held in Delhi from the 23rd of October to the 3rd of November 2010. October & November are easily one of the most pleasant months in Delhi with the temperatures hovering in the average band, the rainfall is almost negligible and the wind speed is of a gentle breeze variety, taking away any warmth that might be there during the day.

<table>
<thead>
<tr>
<th>October-November Climatic Data (Based on the average of the last 10 years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>October (15° to 31°)</td>
</tr>
<tr>
<td>- Mean Daily Max. Temperature (°C) : 31.3</td>

</tr>
<tr>
<td>- Mean Daily Min. Temperature (°C) : 14.6</td>
</tr>
<tr>
<td>- Average Rainfall (mm) : 3.6</td>
</tr>
<tr>
<td>- Average number of Rainy Days : 1 - 2</td>
</tr>
</tbody>
</table>

When Delhi Truly Blooms

October & November months are typically salubrious climate - stable, mild, dry and semi-warm unlike the high temperatures of scorching summer. Rainfall is rare and rarely are whole days wasted due to rain. On an average, during the proposed period of the Games, only 1 - 2 days will have rain which, if at all, tends to be mild, unlike the torrential downpours of the Monsoon months of July & August.

In October & November, Delhi takes on colourful hues. Its wide boulevards and tree-lined avenues reflect the colours of autumn in every colour known to nature. The huge roundabouts are a riot of colours and flowers of every imaginable shape & colour are visible across the city.
Sports Programme

1. Proposed Dates for the Games

2. Sports in the programme:

- The dates as proposed for the 2010 Commonwealth Games, Delhi have been carefully selected based on scientific data and analysis of the climatic conditions.
- The Games are scheduled over a period of 11 days while the competitions will take place over 12 days to allow for the extended programmes of several sports.
- Based on the successes and response to programmes in Kuala Lumpur in 1998 and Manchester in 2002, 15 sports have been short-listed. These also conform to Article 22 of the constitution of the Commonwealth Games Federation.
- The inclusions are: 61 individual sports, 18 team sports
- Provision has been made to include events for elite athletes with a disability in the Sports Programme of the 2010 Commonwealth Games.
- The finals have been so scheduled that they do not conflict with each other.
- All sports will be played strictly in accordance to the rules and regulations of the accredited International Sports Federations as well as the CGF.
- Majority of the proposed venues are already in existence. Minor up-gradations, if and whenever required, as well as remainder constructions will be completed by 2007. The venues have been selected conforming to The Host City Contract (Protocol 10 and Regulation 3) and have been selected because of their:
  - Proximity to the Games Village.
  - Ability to hold international events with success.
  - Environments, which would help athletes in maximizing their performance.
  - Ability to accommodate maximum spectators.
Sports Programme

The Calendar

The Calendar for each of the Sports for the 2010 Commonwealth Games was created keeping in mind:
- Consultations with the proposed sports federations & venue authorities.
- Precedents set in the previous Commonwealth & Olympic Games.

The Delhi 2010 Commonwealth Bid Committee has worked towards finalizing the extended and revised sports dates to the Sports Programme. Only three sports - Hockey, Badminton and Squash would have their preliminary rounds starting one day prior to the Opening Ceremony. Opening Ceremony has a day set aside exclusively with no competitions taking place.

Factors Leading To The Sports Programme

Final Dates for the Sports Programme were decided after analysis and a few other considerations:
- Venue Availability & No Conflict with other Events
  Management of the proposed venues have confirmed availability and pledged their support on the Sports Programme, as per the scheduled Calendar.
- No Conflict with Major Televised Sports Events
  Consultations have been held with the major television and broadcast networks on the prospects of a conflict of televisual events. No conflict on these dates has been identified.
- Weather Conducive To Peak Performances
  Delhi Weather during the Sports Programme would be suitable, mild and rather invigorating. Helping competitors deliver peak performances in outdoor conditions.

AQUATICS

Definition: In accordance with Article 41 of the Constitution of the sport of Swimming (Aquatics) includes the disciplines of Swimming (pool racing). All three disciplines are included in the proposed sports programme. However, to avoid confusion in this document, the term Aquatics has been adopted to encompass:

i) Swimming (pool racing)
ii) Diving
iii) Synchronised Swimming

All three disciplines will be contested in the Dr. Shyama Prasad Mukherjee Swimming Pool. Currently, it is the sports center for Swimming, Diving, Synchronised Swimming, Water Polo etc.

Major Aquatics Events In The Past

|--------------------------------------------|---------------------------------------------------------------|-------------------|---------------------------------------------------------------|

Swimming

Competition Format

Day 2 to Day 7

Swimming would commence on Day 2 and continue for five days in accordance with the newly accepted format of heats, semi-finals, and finals. Heats would be held each morning at 9:00 a.m. with the finals scheduled to take place in the evenings at 7:00 p.m. IST.

The heats would occupy approximately two hours, as would the finals. A list of Swimming events at the proposed Delhi 2010 Commonwealth Games is as follows:

<table>

</tbody>
</table>

Competition Standards

As per Article 42 of the Constitution, the Swimming competition would be run under the auspices of the National Amateur (FINA) and the Swimming Federation of India (SF) and in accordance with the rules of the Commonwealth Games Federation (CGF). FINA rules would be in use for all Aquatic events.
Sports Programme

Venue
As an existing international standard facility with the proven capability of conducting world-class events, Dr. Shyama Prasad Mukherjee Swimming Complex is the proposed venue for the Swimming programme.

Training Facilities
It is proposed that full and exclusive access to the competition venue would be made available at least seven days prior to the Games for training and familiarisation purposes.

Delhi has a large number of 50 metres swimming pools, which would be more than suitable for training purposes. Three outdoor pools in close proximity to the Village have been selected:

- National Stadium Sports Complex
- Delhi Development Sports Complex, Siri Fort
- Modern School Aquatic Centre

Event Management
Swimming will be managed under the auspices of the Swimming Federation of India with an additional 144 staff estimated to be required to conduct the programme. The personnel are grouped as follows:

<table>
<thead>
<tr>
<th>Personnel</th>
<th>Nos.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Volunteers (General)</td>
<td>20</td>

<td>144</td>
</tr>
</tbody>
</table>

Diving

The sport of Diving is integral to the unique character of the Commonwealth Games. Delhi proposes to hold the Diving programme in 2010 at the Dr. Shyama Prasad Mukherjee Aquatics Centre running concurrently with the Swimming programme.

Delhi is well placed to host international events using world standard facilities and highly qualified officials.

</tr>
</tbody>
</table>

Competition Standards
The Diving competition would be run under the auspices of Federation Internationale de Natation Amateur (FINA) and Swimming Federation of India (SF) in accordance with the Commonwealth Games Federation (CGF).
**Training Facilities**

It is envisaged that proper scheduling will mean that Dr. Shyama Prasad Mukherjee Swimming Pool will be the only venue required for training, however, other facilities will be made available should the need become obvious.

**Event Management**

Diving will be managed under the auspices of the Swimming Federation of India with an additional IOS staff estimated to be required to conduct the programme. The personnel are grouped as follows:

<table>
<thead>
<tr>
<th>Personnel</th>
<th>Nos.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Volunteers (General)</td>
<td>20</td>

</tr>
<tr>
<td>Committee Members</td>
<td>10</td>
</tr>
<tr>
<td>Staff</td>
<td>5</td>
</tr>
<tr>
<td>Total</td>
<td>105</td>
</tr>
</tbody>
</table>

The responsibility for conducting the Diving Programme ultimately lies with the Swimming Federation of India and in accordance with the rules of the International Federation (FINA)

---

**Synchronised Swimming**

Synchronised Swimming is a recent addition to the Commonwealth Games Sports Programme having made its debut in 1986. This discipline, which comes under the auspices of FINA, proved to be a very popular spectator event in Kuala Lumpur.

It is proposed that Synchronised Swimming be conducted in the main competition Swimming pool at the Dr. Shyama Prasad Mukherjee over two days, following the Diving programme.

**Competition Format**

Day 3

The proposed programme for the Synchronised Swimming will take place in the four disciplines of the Technical Routine (Solo & Duet) and the Free Routine (Solo & Duet).

A list of Synchronised Swimming events at the proposed Delhi 2010 Commonwealth Games is as follows:

<table>
<thead>
<tr>
<th>Events</th>
<th>Male</th>
<th>Female</th>
</tr>
</thead>
<tbody>
<tr>
<td>Technical Routine Solo</td>
<td>A</td>
<td>A</td>

<td>A</td>
</tr>
<tr>
<td>Free Routine Solo</td>
<td>A</td>
<td>A</td>
</tr>
<tr>
<td>Free Routine Duet</td>
<td>A</td>
<td>A</td>
</tr>
</tbody>
</table>

**Training Facilities**

Warm up and Training would take place at modern School Swimming Centre, Sri Fort Swimming Pool and National Stadium Swimming Centre.

**Event Management**

Synchronised Swimming will be managed under the auspices of the Swimming Federation of India (SFI) with additional IOS staff estimated to be required to conduct the programme. The personnel are grouped as follows:

<table>
<thead>
<tr>
<th>Personnel</th>
<th>Nos.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Volunteers (General)</td>
<td>20</td>

</tr>
<tr>
<td>Committee Members</td>
<td>10</td>
</tr>
<tr>
<td>Staff</td>
<td>4</td>
</tr>
<tr>
<td>Total</td>
<td>65</td>
</tr>
</tbody>
</table>

The responsibility for conducting the Synchronised Swimming programme ultimately lies with the Swimming Federation of India and in accordance with the rules of the International Federation (FINA).
Athletics

The Venue proposed for the track and field competition of the 2010 Commonwealth Games is the renowned Jawaharlal Nehru Stadium. It is the centre point of the Commonwealth Games area and is just 8 km from the City Centre. It has been substantially upgraded in recent times and now provides first class corporate and spectator facilities. The Jawaharlal Nehru Stadium can easily seat 70,000 spectators.

Sports Programme

Athletics

Venue
Track & Field
The Venue for Track and Field events will be the Jawaharlal Nehru Stadium.

Walks
It is proposed that the three Walk events (10, 20 and 50 km) be contested on a
road circuit around the Jawaharlal Nehru Sports Complex.
This course is used regularly for National, Inter-state and International events.

Marathon
The course for both men's & women's marathon running events would be
designed as “out and back” so that they start and finish in the main stadium.

Competition Standards
The Competition schedule and event timings will be determined in consultation with the International Amateur Athletics Federation (IAAF),
Amateur Athletics Federation of India (AAFI) and the CGF.

Training Facilities
Delhi has a number of existing athletics facilities such as Delhi Development
Authorities Sports Complexes, located very near to the Jawaharlal Nehru
Stadium, making them the perfect venues for both training and warm-up.

Event Management
Athletics will be managed under the auspices of Indian Olympic Association
with an additional 405 staff estimated to be required to conduct the
programme. These personnel are grouped as follows:

<table>
<thead>
<tr>
<th>Personnel</th>
<th>No.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Volunteers (General)</td>
<td>100</td>

<td>10</td>
</tr>
<tr>
<td>Staff</td>
<td>10</td>
</tr>
<tr>
<td>Total</td>
<td>405</td>
</tr>
</tbody>
</table>

The responsibility of conducting the Athletics Programme ultimately lies with
Amateur Athletics Federation of India in conjunction with I.O.A. and
Organising Committee in accordance with the rules of International
Federation (IAAF).
BADMINTON

The Badminton competitions will be conducted at Sri Fort Indoor Stadium in Delhi. Ideally located, this facility is very close to other major venues and at a short distance from the Games Village. Badminton has been one of the major attractions and a prominent fixture in the Games programme since 1998 and is a very strong event in the Commonwealth countries.

**Competition Format**

**Day 00, Day 1 to Day 11**

The complex nature of the Badminton tournaments necessitates that competitors will require 11 days to complete the programme, including both team and individual events. Allowing for a free day for all sports on the day of the Opening Ceremony, it is therefore necessary to start the Badminton tournament one day prior to the official opening.

It is proposed that the teams’ competition will start one day before the Opening Ceremony, continuing on Days 1 to 5. The individual events will take place on Days 6 to 10.

</tr>
</tbody>
</table>

**Competition Standards**

The Badminton competition would be conducted under the rules of the International Badminton Federation (IBF) and conform to any special requirements of the CGF. It will be run in conjunction with the Badminton Association of India.

**Venue**

In order to maximize spectator attendance and to accommodate the athletes, competition schedules adequately, one international standard venue i.e. Sri Fort Indoor Stadium Badminton Hall which has a seating capacity of 4,000 spectators and comprises 7 courts, has been selected.

**Training Facilities**

Sri Fort Indoor Stadium Badminton Hall will be available prior to the competition, which will have courts set aside for warm-ups.

**Event Management**

Badminton will be managed under the auspices of the Indian Olympic Association with an additional 181 staff estimated to be required to conduct the programme. These personnel are grouped as follows:

<table>

The responsibility for conducting the Badminton Programme ultimately lies with Badminton Association of India in conjunction with I.O.A. and the Organising Committee in accordance with the rules of the International Badminton Federation (IBF).
SPORTS PROGRAMME

BOXING

Boxing competitions will be conducted in an outstanding venue - a modern new Indoor Stadium which is proposed at the Sates Sports Complex. Boxing is a foundation sport of the Commonwealth Games and is contested in the vast majority of the member countries. This venue will further help in enhancing the high popularity that this sport already enjoys.

Some Of The Major Boxing Events In The Past

| Event                        | Year |
|------------------------------|------|-------|
| YMCA International Boxing Championships | 1995 |       |
| Atlajania Cup International Boxing Championship | 1996 |       |
| YMCA International Boxing Championships | 1997 |       |
| YMCA International Boxing Championships | 1998 |       |
| Atlajania Cup International Boxing Championship | 1999 |       |
| YMCA Junior International Boxing Championship | 2002 |       |
| 2nd Asian Women's Boxing Championships | 2003 Scheduled |       |
| 1st International Boxing Championship for Seniors | 2003 Scheduled |       |

Competition Format

Day 2 to Day 6, Day 9: Finals.

The preliminary rounds on Days 2 to 6 will be conducted in a fully equipped single ring at the new Indoor Stadium in Saltet Complex.

The Competition Schedule has been developed by the Indian Amateur Boxing Federation (IABF) in conjunction with the I.O.A. and Organizing Committee in accordance with the rules of International Federation (AIBA).

Event Management

The Boxing competition will be conducted according to the rules and regulations of the International Amateur Boxing Association in accordance with the rules specified by I.O.A. Boxing will be managed under the auspices of Indian Olympic Association (I.O.A.) with the addition of 85 staff estimated to be required to conduct the programme. These personnel are grouped as follows:

<table>
<thead>
<tr>
<th>Personnel</th>
<th>Nos.</th>

Cycling

Cycling has been part of the Commonwealth Games since 1934 and has a history of high participation and popularity. The sport of Cycling for the proposed Delhi 2010 Commonwealth Games incorporates both Road & Track components. The Track Cycling competition will be held at the specially designed, world-standard Yamuna Velodrome, providing the competitors excellent facilities for optimum performance. Cycling also enjoys a system of well-developed programmes offering opportunities for mass participation as well as highly skilled, elite training for athletes.

</tbody>
</table>

Training Facilities

For the track component, Cyclists will be able to train at the Competition Velodrome. The athletes village will have excellent access to a number of suitable roads which will be used for road racing.

Competition Format:

Day 2: to Day 7: Track events will be held during the morning and evening on Days 2 to 4 with a time trial on Day 6 and Road races on Days 5 and 10. Cycling is an Olympic sport, therefore the programme proposed by Delhi 2010 will contain all of the Olympic events (as per the CGF constitution).

Event Management

The Cycling events will be conducted under the rules & regulations of the International Cycling Union (UCI) and will accommodate any specific requirements from the Commonwealth Games Federation (CGF). Cycling will be managed under the auspices of Indian Olympic Association with an additional 194 staff estimated to be required to conduct the programme. These personnel are grouped as follows:

</tr>
</tbody>
</table>

The responsibility for conducting the Cycling programme ultimately lies with Cycling Federation of India in conjunction with IOA and Organising Committee in accordance with the rules of International Federation (UCI).
GYMNASTICS

Gymnastics was first included in the Commonwealth Games in 1978 and after a lapse of twelve years, returned for the 1990 Commonwealth Games in Auckland. The popularity of Gymnastics worldwide will make it an integral component of the proposed Delhi 2010 Sports Programme. Gymnastics in Delhi-2010 will be a combination of two disciplines, Artistic and Rhythmic. It is proposed that the Artistic and the Rhythmic disciplines be conducted in the Indira Gandhi Indoor Stadium which has 12,000 seating capacity. In this stadium, gymnasts can be assured of an environment, which will help them perform at their peak.

Major Gymnastics Events In The Past:

- SAF Games 1998
- 1st Central South Asian Championships 2000
- 1st SAARC International Gymnastic Championship Games 2001

Overview

The present focus of Gymnastics in India is on the planning, participation and conducting of the sport at the 2010 Commonwealth Games in Delhi. To run an International contest of this magnitude requires a large staff of technical officials and management. The enthusiasm and organisation within Gymnastics in India makes the provision of the workforce an easily managed task.

Competition Format

Day 2 to Day 4: Individual Finals
Day 9 to Day 11: Rhythmic Gymnastics

The proposed programme for Competition has been drawn by the Gymnastics federation of India and in accordance with the rules and regulations of the International Gymnastics Federation (FIG).

</tbody>
</table>
The responsibility of conducting the Gymnastics Programme ultimately lies with the Gymnastics Federation of India in conjunction with I.O.A. and Organising Committee in accordance with the rules of International Federation (FIG).

Venue
Indira Gandhi Indoor Stadium, Delhi

Training Facilities
Training & warm up facility will be constructed in the air-conditioned Hall adjoining the Competition Hall next to the Competition Venue. This facility would contain full sets of equipment and will be available for training at least seven days prior to and during the event.

In addition to this, there are further Gymnastic training facilities within easy travelling distance from the Games Village.

Hockey

Hockey was one of the team sports included for the first time in the Commonwealth Games programme in Kuala Lumpur in 1998. Overwhelming response to the same, proves that the sport is a favourite event with the audiences too.

As a strong Commonwealth sport, Hockey deserves its place in the proposed Delhi 2010 Commonwealth Games Sports Programme.

Overview
Hockey in India enjoys a strong public profile through the achievements of both men & women teams in the international arena. The sport is currently enjoying an upsurge with an obvious increase in participation and the development of national men's and women's leagues.

Regular international events have been held, in and around India regularly, which are both good for the athletes and also for the development of expertise in the ranks of official & organisers. India is well positioned to conduct a high level Hockey competition in Delhi in 2010.

</tr>
</thead>
<tbody>
<tr>
<td>Hockey</td>
<td>✓</td>
<td>✓</td>
</tr>
</tbody>
</table>

Competition Standards
The Games tournament will be conducted under the rules and regulations of the International Hockey Federation (FIH) and will accommodate any specific requirements from the Commonwealth Games Federation (CGF). The Hockey Programme will be conducted by the Delhi 2010 Organising Committee in conjunction with:
- Indian Hockey Federation (Men)
- Indian Women's Hockey Federation (Women)
It will meet all standards set by FIH with regard to the use of internationally accredited officials and facilities.

Venue
Two Hockey Stadia i.e. Dhyan Chand National Hockey Stadium and Shreeji Stadium have been earmarked for Mens and Womens Competitions respectively.

Training Facilities
The popularity of Hockey in Delhi affords the provision of Hockey pitches available for practice purposes prior to and during the tournament, besides the competition venues.

Event Management
Hockey will be managed under the auspices of the Delhi 2010 Organising Committee with an additional 133 staff being employed to conduct the programme. These personnel are grouped as follows:

<table>
<thead>
<tr>
<th>Personnel</th>
<th>Nos.</th>
</tr>

<td>133</td>
</tr>
</tbody>
</table>

The responsibility for conducting the Hockey Programme ultimately lies with Delhi 2010 Organising Committee in conjunction with the Indian Hockey Federation (Men) and Indian Women's Hockey Federation (Women) and in accordance with the rules of the International Federation (FIH).
The inclusion of Lawn Bowls is one of the elements that gives the Commonwealth Games its individuality. Lawn Bowls has been part of the Sports Programme since 1930 and India is committed to continuing this fine tradition.

Delhi is looking to attract a record number of Lawn Bowls participants at the proposed brand new facility at the Jawaharlal Sports Complex, which is just 20 minutes travel from the Games Village.

**Overview**

Lawn Bowls is now increasingly recognized as a sport for all ages and abilities. Regular national events are held throughout India each year with the resultant increase in player skill levels and the development of organizing and officiating expertise.

**Competition Format**

Day 2 to Day 10

The proposed Lawn Bowls Sports Programme allows for start of play on the day following the Opening Ceremony, with the last of the finals being completed prior to the Closing Ceremony.

The Competition schedule as prepared by Indian Olympic Association provides that preliminary games will be played in each category leading to:

- The final of the Women’s Fours on the evening of Day 5,
- the Men’s Fours on the evening of Day 6,
- the Women’s Pairs on the evening of Day 7,
- and Men’s Pairs on the evening of Day 8.

The Medal rounds of the Men’s & Women’s singles would be held on Day 9. This format would maximize player comfort and rest levels as well as ensure the highest levels of audience support & participation.

**Competition Standards**

The Games tournament would be conducted under the rules and regulations of the World Bowls Board (WBB) along with the International Women’s Bowling Board (IWBB) and would accommodate any specific requirements of the Commonwealth Games Federation.

**Event Management**

Lawn Bowls will be managed under the auspices of Indian Olympic Association with an additional 1% staff estimated to be required to conduct the programme. These personnel are grouped as follows:

<table>
<thead>
<tr>
<th>Personnel</th>
<th>Nos</th>
</tr>

</tr>
</tbody>
</table>

The responsibility for conducting the Lawn Bowls Programme ultimately lies with Lawn Bowls Federation of India in conjunction with I.O.A. and Organizing Committee in accordance with the rules of International federations (WBB).
NETBALL

Netball was included in the Commonwealth Games for the first time in 1998 in Kuala Lumpur and has the status of being the compulsory team sport for all future Commonwealth Games Sports Programmes. The preliminary rounds of the Netball competition will be held in a new state Netball Centre with a capacity of 3,000 which is planned to be specially created well before the 2010 Commonwealth Games. This new facility will also help in popularizing the sport and spreading greater awareness for the same.

Overview

Netball in India is being administered professionally and has programmes for the development of participation, junior athletes, elite training, technical officials and coaches that are coordinated on a national basis.

Competition Format

Day-3 to Day-8, Day-10: Finals

<table>
<thead>
<tr>
<th>Event</th>
<th>Male</th>

</tr>
</tbody>
</table>

The proposed Netball competition has been developed by the Netball Federation of India along with the Netball Association of Delhi taking into consideration the rules and regulations of the International Federation of Netball (IFNA).

Competition Standards

The Netball competition will be conducted by Netball Federation of India under International Federation of Netball (IFNA) Constitution and the Commonwealth Games Federation (CGF) Constitution and by-laws.

Venue

The Netball competition will be presented at the new Netball Centre, at the Talkatora Indoor Stadium. This facility will be a five-court stadium.

Training Facilities

The State Netball Centre has the capacity to provide extra training courts in addition to the competition courts. This facility will be made available to the players at least seven days prior to the start of the competition and will be available for scheduled training and warm-up during the Games.

Event Management

Netball will be managed under the auspices of Indian Olympic Association with an additional 119 staff estimated to be required to conduct the programme. These personnel are grouped as follows:

<table>

The responsibility for conducting the Netball Programme ultimately lies with Netball Federation of India in conjunction with I.O.A. and the Organising Committee in accordance with the rules of International Federation (IFNA).
RUGBY 7's

Rugby 7's was another of the success stories of the 1998 Commonwealth Games in Kuala Lumpur - drawing large crowds to watch some of the world's best Rugby players. Originating in England, Rugby has its traditions firmly entrenched in the Commonwealth nations and its inclusion only adds to the unique character of the proposed Sports Programme.

To this end, in order to maximize the attendance and promotion of Rugby, the tournament will be played at Dr. Ambedkar Stadium.

Overview

In 1823, at the school of Rugby, a sixteen year-old schoolboy by the name of William Webb Ellis, picked up the football and ran with it instead of kicking it. He was at that time, the unknown founder of a major sport. Webb Ellis died in 1872, a year after the formation of the Rugby Football Union.

Today, Rugby Football is the fastest growing sport in the world and the International Rugby Board (IRB), which is the premier Rugby Association in the world, has 92 members spread across the globe.

India, being a part of the Commonwealth, has a rich history tradition of Rugby Football. Rugby was first introduced in India in 1872, when a match was played at the Calcutta Football Club (CFC). The match was played between England and a combined side from Scotland, Ireland and Wales. The Calcutta Cup, first played in 1879 between Scotland and England, was presented by the CFC to Rugby Football Union (RFU). The RFU reciprocated this gesture by presenting the All India Cup in 1926. All the teams in India keenly contest for this Cup till date.

As one of the first countries in Asia to play Rugby, India provides an ideal launching pad for the spread of the game in developing countries. With a large population that increasingly turns to sport for entertainment, India offers the best opportunity for the game to cross new frontiers and scale new heights in its search for popularity and viewership.

Although Rugby has been played in India for over a century and it had unheedingly remained limited to a few urban centers. Currently however, the Indian Rugby Football Union (IRFU) boasts of over 2,500 players from as many as 15 centers. Through concerted efforts of the RFU, Rugby is spreading to previously untapped areas. Today, Rugby is played virtually all over the country viz. Mumbai, Kolkata, Manipur, Delhi, Orissa, Chennai, Bangalore, Pondicherry, Hyderabad, Pune, Goa, Ahmedabad just to name few. With a large population, India provides an ideal base to spread the game’s popularity.

Rugby in India is also very diverse. The players come from different backgrounds and different countries, all united to indulge in the sport they so love. It is inspiring to watch people from different social-economic backgrounds and different cultures share a passion so completely that no divisions can separate the spirit of camaraderie and teamwork. What is even more awesome is the fact that the same can be said of the Rugby fraternity world over, and this perhaps is the greatest aspect of the game. There is no doubt that Rugby is a “Gentleman’s Game”, one that brings out the best qualities in a person to enable him/her to give one’s best for the team.

It was with the aim of spreading Rugby at the grassroots level and promoting the sport on all other levels that the Indian Rugby Football Union (IRFU) was formed. The IRFU, a member of the International Rugby Board (IRB), the Asian Rugby Football Union (ARFU) as well as a member of the Indian Olympic Association.

In the last 2 years the IRFU has instituted the following development plans all over India:

Schools Development Programme

- It has been the aim of the IRFU to inculcate into the youth of India, the values of a strong mind and a strong body.
- There are now over 500 schools across India, which have been introduced to Rugby and this number is increasing every year.
- It is expected that the Sainik Schools would shortly introduce the game, which in turn will immensely benefit the Armed Forces.
- Rugby has been introduced through two recognized NGOs in Kolkata and Mumbai and already there are over 200 underprivileged children actively playing the game and also competing in national competitions.
Men's Development Programme

There has been a concerted effort in the last 2 years to recruit athletes for Club level Rugby. In order to achieve this end, the following has been done:

- Touch Rugby has been introduced in select colleges as a 'team fitness sport'. International cricket teams like S. Africa, New Zealand, Australia, England and even Sri Lanka play touch rugby for fitness and teamwork. These same qualities have been imbied in the players of the few select colleges. The success of this program has been tremendous and Rugby will soon be introduced in colleges on a national level.
- One of the biggest breakthroughs recently has been the introduction of the game in the Armed Forces. Although the Western Naval Command has now been playing since over 2 years, but only recently on 12th April, 2003 a live demonstration of the game was given to the Army at the Armoured Corps Centre, Ahmednagar. It is now hoped that within this year itself, the game will be officially introduced within the Army as well as the Academy and simultaneously within the Sainik Schools.
- The Bombay and Calcutta Police have already been playing Rugby for over 40 years. The Chennai Police has formally started playing since 2002.
- A concerted effort is also being made in starting the game with the Railways and other Govt. Institutions.

Competition Format

Day 2 to Day 4
The Rugby competition will be conducted at Dr. Ambedkar Stadium over three days from 25th to 27th October 2010. The event will follow the standard internationally recognized format for Rugby 7's, with teams playing two seven-minute halves. Independent, internationally qualified referees will be provided for each game.

<table>

Competition Standards

The Rugby competition will be conducted according to the rules & regulations of the International Rugby Football Board (IRFB), taking into account any specific requirements as outlined by the Commonwealth Games Federation (CGF). The Delhi-2010 Commonwealth Games Organising Committee in alliance with Indian Rugby Football Union (IRFU) will undertake it.

Venue

The competition will take place in Dr. Ambedkar Football Stadium. This sports complex has state-of-the-art facilities for the athletes as well as for broadcasting and corporate hospitality.

Training Facilities

Training facilities are already in place at Sri Fort Sports Complex of Delhi Development Authority and will also be a part of the proposed Commonwealth Games Village.

Event Management

Rugby 7's will be managed under the auspices of the Delhi-2010 Organising Committee with an additional 134 staff estimated to be required to conduct the programme. These personnel are grouped as follows:

<table>
<thead>
<tr>

</tbody>
</table>

The responsibility for conducting the Rugby 7's programme ultimately lies with the Delhi 2010 Organising Committee in alliance with India Rugby Football Union (IRFU).
SHOOTING

Shooting is an intensely competitive sport throughout the Commonwealth. Whilst not attracting huge spectator numbers, various disciplines of Shooting are contested in the vast majority of member countries and therefore deserve inclusion in the proposed 2010 Commonwealth Games sports programme. It is proposed that the Shooting programme would be divided into four major categories, which are:

- Pistol
- Small Bore Rifle
- Clay Target
- Full Bore Rifle

These four categories would be contested at the picturesque Dr. Kari Singh Shooting Ranges, which boasts of facilities of the highest international standards.

Overview

Shooting in India is based on a 'strong State Association' system. All elements of the sport - Small Bore and Air Rifle, Pistol, Full Bore Rifle and Clay Target are committed to working together for the collective benefit of the sport. All disciplines have a structured Organisation with substantial numbers of experienced officials in each, India has a long history of conducting national and international events in all disciplines and as such has developed high levels of expertise in the various organizations.

Competition Standards

The Games tournament will be conducted under the rules & regulations of the International Shooting Sport Federation (ISSF). Conducting of Shooting Programmes ultimately lies with National Rifle Association of India and accommodates any specific requirements from the Commonwealth Games federation (CGF).

Note:-
The Department of Customs has advised that the import of firearms for Shooting Competition is permissible provided the appropriate documentation is completed and the correct ports of entry utilized.

Venue

At the Dr. K. S. Singh Shooting Ranges located in the hills of Aravalli, the Sports Authority of India is constantly adding to its already comprehensive array of facilities and equipment and through Government funding, will further upgrade its ranges and electronic target systems.

Training Facilities

Will be scheduled at the Venue itself, the Dr. K. S. Singh Shooting Ranges.

Event Management

All Shooting disciplines will be managed under the auspices of the Delhi 2010 Organising Committee. It is estimated that Clay target and Pistol / Small Bore Rifle / Full Bore will each require an additional 160 staff totaling 480 to conduct the programme. The breakdown of personnel for all the Shooting disciplines is grouped as follows.

SQUASH

The sport of Squash entered the Commonwealth Games programme for the first time in Kuala Lumpur in 1998 and was deemed to be very successful. For the 2010 Commonwealth Games in Delhi too, it is proposed to include Squash in the list of Sports events and all the three competitions Men, Women and Team are proposed to be included in the Squash Competition, which will be held at the DDA Siri Fort Sports Complex.

Overview

India has a long history of successes in Squash on the international scene. Many National and International events have been contested in India. Indian officials have vast experience in conducting major competitions.

Competition Format

Day-00, Day-1 to Day-10

In keeping with the rules of the World Squash Federation (WSF), it is proposed that the events to be contested at the 2010 Commonwealth Games in Delhi will be both singles and doubles as in the table below.

The format of the Squash Programme will be determined after consultation with the World Squash Federation, Squash Racket Federation of India and the Commonwealth Games Federation. In order to cater for the increased number of matches that both the Singles and Doubles tournaments create, it is necessary to begin the competition one day prior to the Opening Ceremony. It will be an eleven-day event with a day of no competition to coincide with the Opening Ceremony.

<table>

<td>Singles</td>
<td>△</td>
<td>△</td>
<td>△</td>
</tr>
<tr>
<td>Doubles</td>
<td>△</td>
<td>△</td>
<td>△</td>
</tr>
</tbody>
</table>

Competition Standards

The Competition will be conducted under the rules and regulation of the World Squash Federation keeping in account any specific requirements of the CGF.

Venues

The international-standard venue at the Siri Fort Sports Complex has been selected as the Venue, in consultation with the governing body of Delhi Development Authority and Squash Racket Federation of India.

Training Facilities

The Competition facilities at the DDA Sports Complex at Siri Fort Road and Delhi University will be available to all competing athletes on a scheduled arrangement, at least seven days prior to the start of event and will be available as a warm-up facility during the competition.

Event Management

Squash will be managed under the auspices of Indian Olympic Association with an additional 130 staff estimated to be required to conduct the programme. These personnel are grouped as follows:

<table>
<thead>
<tr>
<th>Personnel</th>
<th>Nos.</th>
</tr>
</thead>
<tbody>

</tr>
<tr>
<td>Total</td>
<td>130</td>
</tr>
</tbody>
</table>

The responsibility for conducting the Squash Programme ultimately lies with Squash Racket Federation of India in conjunction with the I.O.A. and Organising Committee in accordance with the rules of International Federations (WSF).
TABLE TENNIS

Table Tennis is a very popular sport throughout the Commonwealth and as such it is expected that the competition proposed for the 2010 Commonwealth Games in Delhi will generate high participation and fierce contests. The India Gandhi Indoor Stadium will be the venue for this competition and will have the ability to house all warm-up, training and competition requirements on site.

Overview

In India, the sport of Table Tennis is extremely popular and the same is on the increase - both participation wise as well as on the international stage. Table Tennis Federation of India is based in Delhi and is perfectly positioned to organize and oversee an event such as the 2010 Commonwealth Games along with I.O.A. and Organising Committee in accordance with the rules of the International Federation (ITTF).

India has vast experience and can provide the necessary qualified officials to conduct International standard events as can be evidenced by the list of tournaments previously held:

The responsibility for conducting the Table Tennis Programme ultimately lies with Table Tennis Federation of India in conjunction with I.O.A. And the Organising Committee in accordance with the rules of International Federation (ITTF).
WEIGHTLIFTING

Weightlifting has a long history of being an integral part of the Commonwealth Games sports programme. Introduced into the Commonwealth Games in 1950, Weightlifting has proved itself to be a significant element of the Commonwealth Games charter, with a loyal and strong audience following. It is proposed that the Weightlifting competitions will be hosted at the Sri Fort Auditorium of Delhi Development Authority. This venue can easily accommodate over 3,000 spectators. The Weightlifting venue will have adequate space for warm-up as well as fully equipped training facilities.

Overview
Historically, India has a strong reputation in Weightlifting events in the international arena. As with all the sports that Delhi is proposing to host for the 2010 Games, Weightlifting also has a very broad base of participation leading to strong, well-organized programmes. India also has a long history of hosting international events of the highest standard, and as such has developed an extensive expertise in both organizing and officiating.

Competition Format
Day 3 to Day 9
The schedule of competition has been created by officials of the International Weightlifting Federation as well as the Weightlifting Federation of India (IWF and WFI) and follows the format of all recognized events of this level. The competition will be conducted over a seven-day period. Each category will be decided in a singular session with the medal presentations taking place at the conclusion of that specific event.

Venue
The spectators seating for the Weightlifting competition at Sri Fort Auditorium will be set up to cater for 3,000 spectators, facing the competition stage.

Training Facilities
Athletes will have training facilities provided near the competition venue.

The responsibility for conducting the Weightlifting Programme ultimately lies with Indian Weightlifting federation in conjunction with I.O.A and Organising Committee in accordance with the rules of International federations (IWF).

WRESTLING

Introduction

Wrestling is one of the oldest sports not only in India but also in the world. When Olympics started, there were only two events, Wrestling and Athletics. Wrestling is the oldest of all the Olympic Sports, with its history dating back to the year 5000 B.C. Virtually every archaeological study in whatever society has revealed evidence of wrestling. The sport of wrestling was a creation of the culture of the Canadian Indians and Eskimo and was of a simplistic nature, with no written rules or regulations and very few skill requirements.

Wrestling today is one of the most popular games in this country. It has a tremendous mass base and appeal. Wrestling in India has a long history, and with hard work and determination, it has made a praiseworthy progress. The game today is controlled and monitored by the Wrestling Federation of India (WFI) with affiliated units in almost all states and some central boards. This organisation controls sports activities in this game across the length and breadth of the country.

**Competition Standard**

The Games will be conducted under the rules and regulations of the International Federation of Associated Wrestling Styles (FILA). The Wrestling Federation of India operates the Wrestling programmes.

**Venue**

A new and modern Wrestling Hall is proposed to be constructed in South Delhi, where the National and International events can be conducted. It is proposed to have a seating capacity of 5000 spectators and good hostel facilities. This venue would be fully air-conditioned.

**Event Management**

The Wrestling will be managed under the auspices of the Wrestling Federation of India with an additional 145 staff estimated to be required to conduct the programme. These personnel are grouped as follows:

<table>
<thead>
<tr>
<th>Personnel</th>
<th>Nos.</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
<tr>
<td>Total</td>
<td>145</td>
</tr>
</tbody>
</table>

The responsibility for conducting the Wrestling programme ultimately lies with the Wrestling Federation of India, Organising Committee and in accordance with the rules of the International Federation (FILA).

**EVENTS FOR EAD’s**

Following the decision taken at the 1998 General Assembly to include sports for elite athletes with a disability, Delhi has embraced this direction and will provide for selected events to be integrated in the proposed 2010 Sports Programme.

This inclusion will provide an opportunity for elite athletes with a disability to demonstrate their athleticism and act as role models and leaders for others within the Commonwealth.

In accordance with the new provision in the Constitution (Article 4.6.4) the Delhi 2010 Sports Programme proposes to include sports with two events and at least two events in each of those sports recognizing the equity principles outlined in the 1998 General Assembly. The CCF have identified five sports on a select list - Athletics, Lawn Bowls, Swimming, Table Tennis and Weightlifting. Delhi will ensure that these chosen events will form a part of the general Games Competition schedule.

All competition venues are able to accommodate the needs of elite athletes with a disability while the new proposed Games Village will also incorporate the specific requirements of this population group into its design.

**Overview**

India has a long history of providing people with disabilities the chance to participate in sporting events and competitions as well as giving them the opportunity to develop their skills at an elite level.

The Government of India has made it compulsory for all new places, including sporting venues, to be compliant with the needs of people with a disability.

National Paralympic Committee of India is affiliated to the following international level separate bodies for sports for different group of disabilities.
# Sports Programme

ISOD: International Sports Organization for Disabled (for Orthopaedically disabled sports).
IBSA: International Blind Sports Association (for visually disabled sports).
CP-ISRA: Cerebral Palsy-International Sports and Rehabilitation Association (for cerebrally disabled sports).

## Competition Format

**Day 1 to Day 10**

The guidelines as specified in the amended Constitution have yet to be tried and as such, Delhi 2010 would prefer to wait for further guidance before final selection of events is made. However, a firm commitment is in place to include events for the Elite Athletes with a Disability in the Delhi 2010 Sports Programme.

The five sports of Athletics, Swimming, Lawn Bowls, Table Tennis and Weightlifting have been recommended as the designated sports for Elite Athletes with a Disability at this time though this may change in the light of experience. The Organising Committee will select two sports from the five options. The events will be conducted within the regular schedule of each sport selected.

The final selection of the events to be included in the Delhi 2010 Programme has yet to be decided and will be made in accordance with the direction of the Commonwealth Games Federation (CGF).

## Competition Standards

The Games tournament will be conducted under the rules & regulations of the International Paralympic Committee (IPC) and will accommodate any specific requirements from the Commonwealth Games Federation (CGF).

The event will be organized under the auspices of the Delhi 2010 Organising Committee A, National Paralympic Committee of India.

The Competition will meet all standards set by the IPC with regard to the use of internationally accredited officials and facilities.
Sports Programme

Venues
Regardless of the final selection from the five identified sports, all events for elite athletes with a disability will be conducted as part of the overall Games Schedule and will therefore utilize the same venues. These venues all meet international standards for competition as well as requirements of EAD.

Athletics
Jawaharlal Nehru Stadium Sports Complex. The technical equipment and technology will be latest available giving the athletes every opportunity to perform their best.

Swimming
Swimming events will be contested in the Dr. Shyama Prasad Mukherjee Aquatics Complex. The Centre is designed with a limited change of levels and other modifications to provide an excellent environment for EAD who compete in swimming.

Lawn Bowls
Lawn Bowls will be conducted at the new facility proposed in the Jawaharlal Nehru Stadium Sports Complex which will provide a playing surface of the highest quality and will meet all standards and requirements for elite athletes with a disability.

Table Tennis
Indira Gandhi Indoor Stadium will be the venue for Table Tennis Competition and provides full access and facilities for elite Table Tennis players with disability.

Powerlifting
Powerlifting competition will be hosted at the Siri Fort Auditorium. This venue can easily accommodate over 3,000 spectators. The Powerlifting venue will have adequate space for warm-up as well as fully equipped training facilities and has the capability of providing all necessary facilities and equipment for elite athletes with a disability.

Training Facilities
As per all chosen disciplines, training time will be provided at the competition venues at least seven days prior to the Games.

Event Management
The Sports programme of Elite Athletics with a Disability will be managed under the auspices of the Delhi 2010 Organising Committee with an additional 64 staff estimated to be required to conduct the programme. These personnel are grouped as follows:

<table>
<thead>
<tr>
<th>Personnel</th>
<th>Nos.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Volunteers (General)</td>
<td>40</td>

<tr>
<td><strong>Total</strong></td>
<td>64</td>
</tr>
</tbody>
</table>
1. List for each of the Sports and events in your proposed programme the number of experienced technical officials (referee, judges etc.) available locally, and nationally.

2. In each Sport, list the additional technical officials likely to be required under the rules of the relevant international federation.

A comprehensive study plus consultations with all proposed sports governing bodies and relevant federations have helped reach the final figure of Technical Officials required for the conduct of the Games.

It has been ascertained that 2,108 technical officials will be needed for the successful and satisfactory conduct of the Games.

For each sport, in accordance with the Technical Guidelines, analysis has been given to the required number of officials to be provided by the host country and the numbers of those who must be neutral.

365 international technical officials and 1,743 national technical officials will be required.

Comprehensive research and analysis in consultation with all of the proposed sports has been undertaken with regard to the provision of technical officials required to conduct each specific discipline. Factors considered within this research have been:

- The need for neutral officials for subjective sports.
- The necessary qualification standards of officials.
- The specific requirements for representation by the International Federations for each sport.
- The numbers of accredited officials based in Australia and specifically Victoria.
- The proposed training programmes designed to increase the overall numbers of accredited technical officials in Australia.

The following table outlines in detail the number of officials who could be provided under the rules of each sport from within India. It also takes into account those technical officials who would need to be brought in from overseas in accordance with the requirements under the rules of the relevant IFs and the nature of the sports.

The Organising Committee will comply with all clauses within Protocol 16 of the CGF Constitution including the provision of travel expenses for all international officials and free accommodation and meals for a total of eighteen days in the Technical Officials Village.

Technical officials will be provided with uniforms and transport to and from competition venues.

Accommodation

In line with CGF requirements Technical Officials and Credentialed Team Officials not accommodated at the Games Village will be provided with free board and lodging for 18 days.

If a city hotel (or hotels) is adopted, the Organising Committee expects to be able to offer, as a minimum, accommodation in 3.0 to 3.5 Star facilities. Every effort will be made to upgrade this to 4.0 Star through negotiation with the relevant parties.
Sports Facilities

1. Sports and Related Facilities
   i) List designated facilities for the Sports and provide site plans, indicating size, seating capacity and other relevant information, and if not complete anticipated date of completion.
   ii) Please provide details of all proposed training facilities for each of the Sports (with the same level of detail as for (i) above).
   iii) Please provide full details of other proposed facilities e.g. International Broadcast Centre, Main press centre, Official hotels etc.
   iv) Please provide a detailed map indicating the location of all venues, providing details of their proximity i.e. approximate time to travel from village to the main stadium and other venues in a rush hour and a non-rush hour.

All the venues proposed for the 2010 Commonwealth Games either currently exist or will be further upgraded and upgraded or new ones, where required, will be constructed prior to 2007.

- Facilities at all the venues will meet the required international standards.
- The venues that currently exist already hold major international events.
- Venues selected are well connected by transport and a network of main, wide roads which will further have a lane reserved for athletes and officials.
- Venues selected are conducive to top-class performances by athletes and are so designed so as to encourage maximum audience attendance & enjoyment.

The I.O.A. E.P.P! Exercise For Venues

As detailed and highlighted earlier, sports integral to India and the spirit of Delhi the host city for the 2010 Commonwealth Games. One of benefits of sports being a part of the Delhi lifestyle is that there already exist several international class sporting venues.

A majority of the existing venues have already handed several events of international stature and hence boast of facilities and amenities that are already up-to-date and recent.

However to truly work-out the efficiency and efficacy of each of the existing venues they were subjected to an intensive exercise study, the "E.P.P! Evaluate, Project, Plan!" study by the I.O.A. was aimed to analyze & evaluate the capability of each venue to host the identified sport event and Project the additional requirements.

Also the study "Projected & Planned" for new or additional venues for Sports, where lacunae were observed.

For the up-grading and additional requirements as well as for the new venues, the Government has committed funding as and when the same is required.
Travel Times to Competition Venues

The table below sets out distances and bus travel times from the Games Village to the various competition venues.

The majority of the venues are within 15 minutes travel time from the Games Village and those few that are more distant are highly accessible by high quality road links.

Buses will be driven by professional drivers who will also receive specific training on transport traffic management arrangements; routes to be used, entry and exit points of each venue etc. Travel times are based on journeys using the city prime network of flyovers where appropriate and dedicated traffic lanes.

Timetables will be published for athletes and officials. Buses and coaches will be colour-coded and will incorporate appropriate graphics to ensure that there is no doubt about service destinations.

In addition, a staffed Transport Information Centre will be open in the Games Village from the day the first athletes and officials move into the village and will operate throughout the Games.

Also, there will be telephones installed at each of the major venues to enable athletes and officials to call the Transport Information Centre to obtain the latest information on transport service to their venues.

- Amenities within the general area
- Dining and recreation areas
- Medical centre
- Press Centre
- Banking facilities
- Postal telephone, fax and other services
- Travel Bureau
- Dry-cleaning and laundry
- Other facilities

△ The Athletes Games Village has been planned over 100 acres of land and is naturally endowed with greenery.
△ It is ideally located just 25 minutes from the airport, 30 minutes from the Central Business District, and just 20 minutes from all the major venues.
△ A non-smoking zone, the village will be completely self-contained with all requisite facilities for athletes and other residents.
△ A showcase for Indian hospitality it will be a modern development featuring medium density urban design.
△ Dedicated eco-friendly transportation between training venues and competition sites for all athletes and officials.
△ Free and easy access to public transport network for all accredited athletes and officials.
△ Safe, secure and monitored environment at the Village.
△ Designed to cater to the need of athletes with a disability.

A Bird’s Eye Overview

The Athletes Games Village will be created on a 100 acre site in a prime Delhi area, home to some of the most prominent landmarks of the city, just 25 minutes from the airport, 30 minutes from the Central Business District and 20 minutes from all major venues. The village will be a home away from home for athletes and officials.

The Village will have 2 to 3 bedroom apartments for participants, dining and catering facilities, recreation center including a discotheque and swimming pool, medical and miniature shopping centers, etc. It will have modern and durable network of roads, latest communication systems, Internet connections and cable network. Connectivity to the city transportation system, an up-to-date security system, as well as fire protection and safety system will be standard features. The development is being planned so as to address environment concerns and recycle natural resources to make it an ideal vehicle to promote the most advanced methods in creating a sustainable living environment.
Games Village

Easy Accessibility & Transportation

The Village will have modern and durable network of roads. Battery operated buses will ply round the clock covering residential blocks, dining halls, medical center, entertainment center, shopping complex and main entrance. Battery operated Buses will ply regularly between training venues, Games Sites and Village. For C&G officials, chauffeur driven cars will be provided.

Modern Design & Lay-out

The Games Village area will provide excellent amenities and secure accommodation for up to 8,500 athletes and team officials. The plans for the Village are based on a high standard of urban design, as a Games Village. The Games Village will consist of two key zones: the Residential Zone and the International Zone.

Residential Zone

Accommodation will be provided for up to 8,500 athletes and team officials in all new buildings in the Village, constructed to a standard commensurate with their ultimate usage as premium residences which would be sold.

It is proposed that the residential zone will be separated via security from the remainder of the Village with access limited to athletes, officials, accredited visitors and staff.

The accommodation will provide easy access to disabled athletes and officials.

Basic Standards Of High Quality

- Fully equipped bathroom facilities at a ratio of no less than one bathroom per four persons.
- Single bedroom accommodation for all officials.
- Common lounge area for each unit (4-12 persons) with tea/coffee making facilities, sink, small refrigerators, suitable seating and other furniture.
- Lockable storage for personal effects.
- Teams will be located in adjoining areas and appropriate officials will be housed integrally.
- The Village will incorporate a variety of pedestrian streets and open spaces, utilizing the existing vegetation on the site to provide a lively atmosphere and encourage interaction in the public areas and informal spaces.

The International Zone

This area will be a special area within the boundary of the Village separated through accessibility which will be allowed to media, accredited personnel etc. The main structures/facilities will include:

- Administration Centre
- Games Transport Office
- Communication Zone
- Medical Centre including a Physiotherapy Ward, Consulting Rooms etc.
- Central Dining Area, with a seating capacity of 3,000 provided with a kitchen capable of serving 22,000 meals each day.

Delhi is a gourmet's capital noted for the fine quality of its fresh produce and the high standard of multi-cuisine cuisine. This will be reflected in the standard and variety of food available to athletes and officials in the Games Village.

It will serve cuisines from all the six zones of the Commonwealth and staffed and managed by professionals.

Special Cultural Evenings

Every evening programmes representing the culture of all the regions and states of the country will be organized. The visiting countries will be invited to participate in the cultural programmes. They will be told in advance to bring their cultural troupes to exhibit their country's culture and traditions. These cross-cultural programmes will go a long way towards promoting a deeper cultural understanding between the various participating countries.

Press Centre

A fully equipped press center will be incorporated in the Central Complex including interview rooms, press offices, and will be equipped with communication systems for all major networks and individual reporters.

Centres of Faith

Appropriate arrangements and facilities will be made available for each identified religion represented in the Games contingent by way of combined and separate centers of observance.

Training Sports Sites & Recreation

There will be several traditional training & sports sites created inside the village.

Other recreational facilities:
- Library
- Games Rooms
- TV/Video Rooms
- Gymnasium
- Discotheque
- Music/Karaoke Rooms
- Swimming Pool
Accommodation

Please indicate the number of hotel rooms within a 1.5 km radius of the city centre and for any venues outside the city within a 10 km radius of those venues. Please include details of your proposals for:

- Federation Group
- Technical Officials
- I.F. Delegates / Observers
- News Media
- VIPs
- General Public

Stating type and where relevant, costs.

- Federation Group will be accommodated in "First Class" facilities.
- All Technical Officials will be provided appropriate accommodation.
- Specially negotiated accommodation packages will be offered to "extra officials" and to the Media.
- Delhi, and India are known across the world for their exceptional hospitality and warmth towards guests and visitors. This is what forms the base of the vibrant and large hospitality industry in the country.
- A large number of hotel developments in affiliation with world-class chains are planned in the very near future, which will create additional rooms.

A Home Away from Home. For All

As the Commonwealth spirit and movement surge ahead, each successive Games have become larger and bigger. Simultaneously with the growth in the number of sports involved, particularly team sports it has led to a corresponding increase in athletes, team officials and technical officials. Delhi pledges to provide all its guests and visitors the most suitable accommodation offered with a smile and warmth that comes straight from the heart.

The Federation Group

The Federation Group (Officials, Staff & office) will be housed at a suitable first class location in first class conditions. This location will be close to the City Center, all the main Sports Venues as well as the Athletes Games Village. The preferred location is the Central Business District of Connaught Place.

Technical Officials

In line with the Guidelines and Protocols as laid down by the CGF, Technical Officials and Credentialed Team Officials not accommodated at the Games Village will be provided free boarding and lodging for 18 days at alternative venues. The minimum accommodation being offered is in hotels with 3.5 to 4.0 star facilities. Through negotiation with the hotels even those could be upgraded.

I.F. Delegates/Observers

Free board and lodging for up to 18 days will be provided by Delhi and the D.C. for duly accredited and credentialed I.F. Delegates/Observers whose Sports are a part of the Sport Programme. The location for the accommodation will be same as that provided for Technical Officials and offer ample luxury and comfort.

News Media

Even though, as per CGF Guidelines there is no obligation of the D.C. and the Host City to provide accommodation media officials and operatives, the Organising Committee undertakes to negotiate special discounted rates with appropriately located hotels. These would be close by and well connected with the main venues, the CBD as well as the Games Village.
VIP's

VIPs directly associated with the Commonwealth Games Federation family will be provided free accommodation at the Official Hotels of the Taj Palace and ITC Maurya Sheraton. These hotels are in a historic district of Delhi and close to the New Delhi Railway Station, the airport, as well as the CBD and the Centre.

VIPs associated with corporate/commercial interests which in turn are responsible for sponsorship or media rights will be accommodated at the other Official Hotels in the CBD: the Nirvana Metropolitan, Le Meridien, and Hotel Radisson.

Athletes/Team Officials

As also indicated elsewhere, athletes and team officials will be accommodated in accordance with CDP Guidelines & Regulations, at the brand-new swanky and modern Games Village that is proposed to be specially built for the 2010 Commonwealth Games.

Further, luxurious hotel accommodation is also available right next door to the New Delhi Mall Shopping Center, the venue for the Shooting competition and all its various disciplines. This will help athletes, officials and technical officials from competing from the main Games Village and nearby hotel areas, providing more free time for practice and leisure.

General Interstate & Overseas Visitors

Delhi very easily will offer much more accommodation than is considered appropriate to cope with the anticipated inflow for the 2010 Commonwealth Games.

The Delhi Tourism & Transportation Development Corporation Ltd. (DTTDC) under the aegis of the Ministry of Tourism Govt. of India, is already adept at coordinating with the various agencies, operators, transport agencies, airlines, fleet operators etc. and will closely work with their respective Agents and Associations to offer packages that show visitors not only the Games but the incredible destination that Delhi and India are.

Classification Of Hotels

The Ministry of Tourism classifies the hotels under the star system into various categories from one to five-star deluxe. They have recently introduced a category of hotels known as Heritage hotels. The Ministry also relaxes these hotels after three years to ensure that they maintain the requisite standards. The classified hotels today include 248 in one star, 384 in two stars, 401 in three stars, 68 in four stars, 93 in five stars, 48 in five star deluxe and 50 in heritage hotel category.

Heritage Hotels

A new classification of heritage hotels has been introduced to cover functionaries in traditional houses in palaces, havelis, castles, forts and residences built prior to 1950. The traditional structures reflect the ambience and lifestyle of the bygone era and are immensely popular with the tourists. The option is aimed at bringing such properties into the approved sector and to ensure such properties are not lost due to decay or disuse. Forty-two such properties have been classified in the heritage hotel category, providing a room capacity of one thousand three hundred and forty rooms. Guidelines have also been formulated for the conversion of heritage properties into heritage hotels.

Paying Guest Accommodation

In order to augment the accommodation facilities at this major tourist center, paying guest accommodation schemes have been introduced. So far, 472 units have been registered. This scheme is open to the house owners having rooms to let and requisite standard. Paying guest accommodation committees have been constituted in different parts of the country. A directory of paying guest accommodation units has also been brought out by the Ministry for the convenience of the visitors.

Categorywise number of hotels and rooms in Delhi are given below:

Please supply details of your proposals for the following:

a) Village Costs
b) What travel grants will be offered
c) Free board and lodging number of days offered.
d) Hospitals and Medical facilities offered.
e) Drug Testing Procedures - indicate the name of the laboratory & where situated and arrangements for transport of samples.

Any other information you consider relevant.

△ Free board and lodging will be provided in the new and modern Games Village for Athletes, Managers, and Coaches for 25 days.

△ Organizing Committee will provide travel grants for athletes and accompanying officials by working out the average figure on the basis of participation in the Manchester and Melbourne Commonwealth Games.

△ As the Games Village will be kept open for 25 days, the board and lodging requirement team officials will be provided in the Village itself.

△ State-of-the-art hospital providing all the needed medical facilities and health services will be provided at the Games Village.

△ A detailed Medical Directory will be prepared and integrated with other health and other plans.

△ Drug testing procedures and Doping testing centers will be provided in the Village as well as at every Competition Venue. Consequently, there will be total compliance with CGF and International Sports federations' policies on Doping Control.

Village Costs
A rate card system in line with the recent Games will be established for the hire or rental of equipment such as television receivers, VCRs, mobile phones etc. that may be required by Team Managers and which is not provided as part of other general arrangements. Cost is expected to be commensurate with recent Games.

Travel Grant
As indicated earlier, the average figure on the basis of participation in the Manchester and Melbourne Commonwealth Games, will be worked out. This would provide the basis of the Travel Grant for athletes and the accompanying officials. On average this figure works out to approximately US$ 1,500.

Free Boarding & Lodging
As per the Articles of the Constitution and also part of the most recent Invitation to Bid, the Delhi Organizing Committee will meet the costs for athletes and team officials staying in the Village. The Games Village will be kept open for a period of 25 days and the Organizing Committee will offer free accommodation (boarding & lodging) for these 25 days. As per the requirements laid down by CGF, full board and lodging for members of the CGF, technical officials, the delegates of International Federations including referees and VIP delegates from the International Olympic Committee, will be provided free of cost.

Hospitals & Medical Facilities Offer
A state-of-the-art Hospital providing all facilities and health services for the athletes and accompanying officials will be provided in the Games Village. Similarly, it will be ensured that all the members of Commonwealth family have easy access to all the medical and health facilities. An integrated plan for referring emergency services including medical services will be an essential part of the overall organization plan for the conduct of the Games.
Games Village
In accordance with the requirements of the Constitution, a Polyclinic will be set-up at the Games Village. This will provide athlete and team sports medicine services, and will also encompass physiotherapy, chiropody, dental services and a dispensary.

Public Health
This programme will encompass the appointment of environmental health officers to cover the Games Village and Sporting venues 24 hours per day. The specific focus of this programme will be food preparation and compliance with existent health regulations.

Acute Health
The primary designated hospital is likely to be the All India Institute of Medical Sciences (AIIMS) due to its close proximity to the Games Village. These facilities will have an emergency department staffed by two senior doctors and support nursing staff in operation 24 hours per day. Additional support services to be coordinated with other hospitals if required.

VIP Base
The hospital to cater for heads of State and the Games family will most likely be the Indraprastha Apollo Hospital a few minutes from the CBD. Services provided will be as required by the Constitution.

General Public
The general public will be handled by first aid services at venues where appropriate. If a higher level of service is required, transport by ambulance to the nearest appropriate hospital will be the designated normal course of action.

Medical Display
The Organizing Committee and the Department of Health Services will prepare a fully detailed Medical Display to encompass all foreseeable situations. This plan will be integrated with plans prepared by other emergency services.

Proposed Sport Medical Cover.
A comprehensive sports medicine cover has been prepared for the health and care of the following personnel who shall be taking part in the Commonwealth Games in different capacities.
- Athletes
- Technical Officials
- VIPs and VIPs
- Spectators
- Volunteers

The fifteen disciplines identified for the Commonwealth Games shall require a sports medicine set up on different modalities keeping in view the requirement of each game. Medical cover shall be provided at the Games Village in the form of Polyclinic, training and competition sites, the hotels where the technical officials and VIPs are lodged.

Village Poly Clinic
Village Poly Clinic shall be the Nodal Centre for giving the necessary specialized sports medicine cover to all the participants and even officials working during the conduct of the Games. This Poly Clinic shall have 24 hours service given by sports medicine specialists and additionally the Clinic will have consultants on call from different specialties like Orthopaedics, ENT, Gastroenterology, Orthopedics and Dentistry. The Poly Clinic shall have the facilities of examination, dispensing, physiotherapy, hydrotherapy, massage and recovery aids like sauna and Jacuzzi. Medical and para medical staff shall man the same.

The medical staff shall work with the support of administrative staff provided and one administrative head in the capacity of Director, Poly Clinic shall supervise the smooth & efficient functioning of this Nodal Centre. He shall be assisted with a skeleton administrative staff viz., secretaries, receptionists and volunteers. He shall be responsible for complete liaison with all Chief-de-Missions/Secretariats of the Commonwealth Games.

The Village Poly Clinic shall provide necessary infrastructure to the sports physicians accompanying their respective delegations for setting up of one medical unit in their own residential zones. This shall also be the point for providing the basic amenities of examination tables, physiotherapy and massage couches and furniture for the functional use of the sports physicians. No equipment shall be issued and sports physicians desiring to treat their own sports persons shall have to abide by all rules of health hazards.
The Village Poly Clinic shall have a reception zone with office automation and computerized facilities and telecommunication for referring any athlete requiring emergency attention. The major specialty hospitals in the city have been identified and a minimum of 20 beds shall be reserved during the period of the Games in case of any hospitalisation required for any accredited athlete/technical official/VIP.

The Village Poly Clinic, under the control of Director shall also have trained health and hygiene staff to supervise the cleanliness in and around the village. To prevent the spread of any communicable diseases through unhygienic conditions prevailing in the dining halls, kitchens, toilets and surroundings, proper disposal of the garbage from all areas of the Village and also preventive measures against insects, flies, mosquitoes and other microbes will also be the responsibility of the Director. He shall have a proper liaison with public health authorities of Delhi. He shall also be responsible for optimal chlorination of the water supplied in the village for purposes other than drinking as per the International standards laid down.

The Village Poly Clinic shall also have adequate space & resources for a fully equipped dope control station, required in case of out of competition testing for delayed voiding of the dope sample at the competition site, which may have to be brought to Village for the completion of the procedure.

Sports Medicine Cover at Venues

The following sports medicine units will be established at the training sites and competition venues:

- Athletics (Men & Women)
- Aquatics (Men & Women)
- Boxing (Men)
- Hockey (Men & Women)
- Tennis (Men & Women)
- Rugby 7's (Men)
- Weightlifting (Men & Women)
- Shooting (Men & Women)

At each of the above competition venues, the sports medicine cover shall have the basic requirement of examination, evaluation, resuscitation, first aid and basic physiotherapy and massage facilities with specialized sports medicine physicians on duty during the time of the competitions. They shall also render all possible assistance to the team physicians requiring any medication and space for attending to their athletes. One physiotherapist, one masseur and one attendant shall assist the physicians on duty. At the competition site in the arena, stretcher-bearers shall be available for evacuation and an ambulance will be in attendance on stand-by for transporting athletes to Village Poly Clinic/hospital if the case may so arise.

Mobile Sports Medicine Unit

The physiotherapy unit at the venue shall be limited to cryotherapy, stretching and strapping and the basic modality of ultrasonic therapy along with short wave diathermy and TENS. Adequate supply of ice to be made available at all sports medicine centres.

Medical Cover for Spectators

First Aid stations shall be established at all competition venues for providing basic first aid for any kind of illness/injury sustained by any of the spectators. These first aid stations shall be manned by the St. John Ambulance/Locality Health Directorate.

Crisis Management Group

A contingency plan shall be prepared for the crisis management group to come into action at a short notice in case of any natural calamity/stampede-like acts of terrorism and shall have a liaison with all possible units viz. health, security, police, fire management etc. This shall be exclusively manned by the Director General of Health Services in collaboration with other Ministries requiring coordination including air lifting and evacuation and even taking the help of armed forces, who shall be on stand-by and designated.

Medical Cover at Hotels

For the convenience of technical officials and VIPs attending the Games in their official capacity, they shall also be provided with medical cover at their respective hotels for which one medical doctor along with one nursing personnel shall be in attendance 24 hours, at a designated place in each of the hotels where the officials shall be lodged. They will also have a liaison with the Village Poly Clinic and referral hospitals of the city. A transport shall be at their disposal in case of any emergency evacuation or transportation if the need may so arise. The physician on duty shall provide basic medical cover.
**Insurance Cover**

All members of the Commonwealth Games family who form part of the conduct of the Games along with competing athletes shall be insured through a Group insurance scheme. The medical organizing committee shall arrange for the same in consultation with the Commonwealth Games Organizing Committee.

**Publishing of Medical Handbooks**

The Medical Organizing Committee shall also be responsible for publication of the medical handbooks which shall have the complete detailed comprehensive sport medical cover plan including the layout of evacuation, transportation, hospitalization, availability of medicines and drugs which can be issued to the competing athletes and which would be available at the Village Poly Clinics/sports venues. Phone numbers and mobile numbers of all physicians on duty at different places along with the emergency numbers of designated hospitals/specialized nursing homes and the members of the medical organizing committee shall also be published and made available. A “Dope Control Guide” giving the trade name of the prohibited substances and the complete procedure to be followed for the dope sample collection shall also be published and handed over to the Chef-de-Missions and sports physicians of all contingents participating. All other administrative medical preformas required for statistics and records shall also be got printed.

The details of each venue including training and competition site, poly clinic, hotels containing both the infrastructural and the technical manpower and equipment shall be worked out by the Medical Organizing Committee.

**Doping Control Programme**

For the successful conduct of Commonwealth Games, the rules of IODC/WADA Doping Code in force at the time of hosting the Games shall be enforced through an impenetrable and foolproof effective programme which will follow all procedures, laws, bye-laws and statues of the Commonwealth Games federation (CGF) and International Olympic Committee (IOC).

To ensure “Drug Free Sports” a separate Anti Doping Commission of the Commonwealth Games Organizing Committee shall be formed which shall be morally responsible for doping control. Anti Doping Commission (ADC) shall have the members from the host country as well as the nominated members of Commonwealth Games Federation and IOC. It is hoped that by the year 2010 the WADA shall be fully operative and the doping control shall be conducted during the Commonwealth Games 2010 under the overall supervision and guidance of WADA, following the complete Anti Dope Charter in letter and spirit.

National Olympic Committee of India (IOA) has the resources, technical manpower, material and methodology and the organizational capability for carrying out the doping control program during the Games as per the guidelines issued by CGF/WADA.

**Doping Control Operational Structure**

Anti Doping Commission:

The Commonwealth Games Organizing Committee Anti Doping Commission so formulated shall work in close collaboration and liaison with all International Federations and CGF. They shall announce the prohibited classes of substances and methods under the Anti Doping Code in existence during that particular time keeping in view also the list of additional banned substances required to be tested in different disciplines. Competitors shall have to give notification for all those substances which are consumed under medical and therapeutic advice but fall under the clause of prohibited substances in special circumstances like local anesthetics or beta blockers or peptide hormones like insulin for certified insulin dependent diabetic participants.

They shall execute and implement the collection of the samples, the number of which shall be approximately 7-10% of the total number of participants. They shall also be responsible for the complete process from establishments of Dope Control Stations, training of officials, and having a close collaboration with the dope control laboratory responsible for the analytical work. They shall also carry out and take decisions for out of competition testing including the number of samples.

The Anti Doping Commission shall ensure the confidentiality and integrity of the complete doping control process and in particular the sample collection, transportation, analytical process and result management: thus ensuring a highly strict procedural act for securing the chain of custody.
General Arrangement

International independent observers shall also be invited to observe the complete doping control process. During the period of the Games, the Doping Commission Headquarters shall make available a Doping Hotline to clarify the status of medication permissible for the convenience of sports physicians accompanying the teams. They shall also grant permission to use the prohibited substance for therapeutic use on the basis of medical reports and investigations results but only in case a prior written approval is taken by the competitor.

The Anti Doping Commission in collaboration with CCF shall decide the methodology of selecting the competitors for doping control, the procedure for notifying the competitors, the methodology of the samples to be analyzed, doping offences and the hearing procedures to be conducted if any potential doping positive offence is identified. ADC shall be responsible for communicating to the concerned Chef-de-Missions to promptly inform the competitors and convene the hearing to give an opportunity to the sports person for any submission to be made in defense of the potential doping offence. After the hearing they shall also discuss with the representatives of the International Federation the sanctions to be awarded and recommend the same to the Commonwealth Games Organising Committee for the final decision.

The Anti Doping Commission shall be responsible for printing of educational booklets viz. Dope Control Guide listing all prohibited substances and other procedures to be followed during the Games for public circulation.

The Anti Doping Commission shall also submit a compilation report after the games for public circulation.

Doping Control Stations

Doping control stations comprising three areas i.e. waiting room for the athletes, processing room along with male and female toilets shall be located at each venue and shall have the complete furniture and fixtures apart from the standardized doping kits and other materials required for the technical conduct in the collection procedure. Fully secured doping control stations shall have an adequate space complete with refrigeration facilities, television and reading material and adequate supply of sealed non-alcoholic decaffeinated beverages for the competitors.

One dope control station will also be located in the Athletes Games Village for out-of-competition testing after the athlete has been accredited and moved to the village.

Anti Doping Commission will have doping coordinators, dope control officers, dope sampling officers, marshals/chaperones and interpreters at each venue for notification, collection and transportation under complete security and confidentiality with due regard to the rules of the Anti Doping Code maintaining the dignity, esteem and the rights of the athlete concerned. Doping coordinators will be responsible for liaison with the tournament directors of each venue for prior information and intimation in regard to the identified athlete selected randomly by the Anti Doping Commission.

Dope Control Officers will be incharge of the Dope Control Station and ensure availability of the administrative and technical supplies required for the sample collection procedure to be carried out on the random athlete identified for dope test.

Doping Sampling Officers will work under the supervision of Dope Control Officers and shall ensure the collection of samples in their presence from the athlete following the laid-down procedure and making the athlete comfortable in the dope control station during his/her stay up to the completion of the procedure including documentation and sealing of the dope samples collected.

Marshals/Chaperones will be responsible for notification to the identified athlete and escort the sports person to the dope control station giving the time allocated and ensuring non-vetting of the sample while keeping a strict and constant vigil during all kinds of ceremonies/interviews, the athlete may have to attend.

Doping managers will ensure the administrative back-up and other logistic support.

Though the official language of the games shall be English but interpreters in French and Spanish shall be made available at the dope control stations for better communication with non-English speaking competitors.
Present Status

Presently the Dope Control Lab stationed at New Delhi is fully operative and functional with scientific equipments viz. GSMS, HPLC, TLC, Radioimmunoassay and other equipment required for analysis of the urine samples. The Dope Control Lab has an experienced staff but shall require more additional infrastructural inputs apart from the technical staff to get the results within 48 hours of having received the samples. The expertise required for EPO testing in blood samples and for Genetic Doping which has already been incorporated in the latest charter of WADA, the help to train the Indian Sport Scientists and update their knowledge in the detection of these methods shall be the priority of the Indian Olympic Association along with the support from Government of India. The Dope Control Lab is in the process of getting the accreditation from the IOA after having obtained initially the ISO certification of 17025.

The National Olympic Committee of India (INA) has a pool of professionals who are well versed to act as Doping Coordinators, Dope Control Officers, Dope Sampling Officers and Marshals/Chaperones having the experience of working in the notification and sample collection procedures alongside all rules pertaining to the Anti Doping Code of Olympic Movement. These officials are regularly engaged in the domestic championships and also the National Games especially in the preceding two events held in 2001 and 2002 where approximately 500 samples were collected in each National Game during the 10 day period.

Anti Doping Commission shall further strengthen the expertise of these officials through seminars, conferences and workshops with practical approach to appraise with the latest rules and by-laws to be followed as per the Anti Doping Code.

With the experience and the technical manpower, the Indian Olympic Association shall fulfill the Doping Control Programme during the Commonwealth Games 2010 fully ebbing by rules of Anti Doping Code of Olympic Movement/WADA as in existence during the year of hosting the Games.
1. The Organising Committee will contract a host broadcaster, which will be Doordarshan — India’s largest TV network, only as per the CCF’s minimum requirement as per the Host City Contract.

2. The Bid Committee has also undertaken a large volume of work with other Service Providers — including the largest sports networks in the world, to quantify the minimum service levels. The work used in the recent Games at Manchester and Kuala Lumpur will be used as a minimum standard.

3. The National TV & Radio Broadcasters are the Host Broadcasters and will provide live coverage of all the events and at all the venues. The commercial revenue earned by them will be shared between the Host Broadcaster and the Organising Committee.

4. Doordarshan has the necessary expertise and experience of coverage of international events as it has been the host broadcaster for events like the Asian Games, the SAF Games, Davis Cup tournaments, World Cup Cricket, Asia Pacific Senior Championships, World Boxing and also the IFBB Permit Meets. The coverage quality and levels have been of international level.

5. India has kept pace with computer hardware & software advancements taking place across the globe. In fact, the Indian Software Industry as well as Indian software developers are renowned across the world and Indian IT professionals acknowledged to be among the world’s best.

6. The world’s top software/software developing companies have a strong presence in the country.

7. The Technology Plan & Solutions being offered are based on technologies and software currently being used in systems. As and when changes take place, the Plan and Solutions will change too. In fact, the Plan will grow with time.

8. OC guarantees that the 2010 Commonwealth Games will be technologically perfect and will be left as a legacy, perfect in all respects, for the CCF.
Games Management

Preparation to meet the peak load of the games starts almost 3 to 5 months in advance. During this period, integration of data and the multiplicity of operations involved in Games Management has to be accomplished and fine tuned to achieve optimum control in terms of complete information management during the games by the use of IT infrastructure in place. Thus the prime objective of such Management System is to provide an information system, online for Commonwealth Games to the public, athletes, officials, VIPs and organizing committee besides conduction of Games. The objective includes providing highly efficient, reliable, secure and user-friendly information system during the Games.

The objectives will be realized using contemporary state of the art technology in Computer Systems and Information Technology. Technologies include Relational Database Management System (RDBMS), Graphical User Interface (GUI), Client/Server, Internet/Intranet, Transaction Processing and Logging. The latest technologies for redundancy and fail-safe operation will be used for maximum reliability.

Client/Server Environment

From technological point of view, the proposed solution is designed based on client/server technology. The client PCs are placed at the venues, which will be communicating with the central server. During the Games, the data will be updated instantaneously at the central server. This will ensure accurate and instantaneous data availability for dissemination on TV Scoreboard and Press center terminals.

The plus will be that the application will run independently even in case of link failure to the central server. The data will be updated in the central server as and when the link will be restored. This will ensure the availability of data at any instant irrespective of network failures.

User friendly GUI

The User Interface will be with GUI features of list boxes, drag and drop, pop-ups and pull down menus etc. This avoids most of the keyboard entry by the user and will make the software user friendly for all levels of users.

Response Time

The initial data building and pre-games preparation would be done at the central place where all the workstations are connected to the server on LAN. The venues will be connected over dial-up/ISDN lines and the results will be transferred to the central server.

Resilience

This system is designed to overcome failures at various stages in order to serve the user community without breakdown of operations. The following types of failures are taken care of in the design of the system.

- Application program failure
- Client machine failure
- Media failure
- Network failure
- Total computer system failure

Games Management System

CMS would maintain participants’ information and interface to Identity Card Generation System. In this subsystem data related to the following aspects will be recorded: Participants and escorting officials, Technical Officials for the Games (Ex Judges, Referees), Games Authorities, VIPs and Press representatives, Information on Meet records, Asian Games records, World records and Olympic records, Schedule of events, venues and timings.

Accreditation

Accreditation of all participants will be performed at the end of the capture phase. In this phase a unique identity number is generated for all the players, participants, officials, VIPs, volunteers etc. Generation of back numbers to players is also part of this module. This will set up the database for conduct of the Games.

Issuance of Identity Cards to all accredited delegates

The unique identity number generated will be used for interface to the identity card generation. The unique number generated will be based on categories like: Country, Sport event/sub event, Sex, Competition/official/volunteer, Nationality, Security level, Head of the country, Head of delegation, VIP, VIP.

This unique number will be used extensively for cross-checking purposes, security purpose and will appear on the accreditation card and the form. The terminals used for capturing the accreditation data and for printing the ID cards will be placed at a central location.
Identity Card Generation

The Design and Supply of the Identity card material will be provided after discussions with the Commonwealth Games Secretariat. The Games Secretariat will provide sample ID Card to be used by all concerned. GMS will provide interface to ID Card generation/printing system.

Capturing Past History (Records)

Records of previous games (e.g. Other Games, Olympic Games, World record etc) will be captured in the system. Besides these, records of the participating countries and players will also be captured. This will be used as a master database for displaying the players’ ranking and past-performance. Also, if the country or the player creates new records, this information will be used as reference for indicating the ‘RECORD’ automatically. This information will also be used for displaying the personal history of players or country’s history on TV and by the press.

Conduct of Games

The system shall cater to conduct of all the sports. The final reports that are to be submitted to the Organising Committee will be customized in consultation with the Games Council.

Conduct of Games refers to using various subsystems of the Games Management System in order to carry out various activities associated with the conduct of the games sport.

Official Assignments

This activity will consist of:

- providing information on various officials such as judges, referees etc., registered for officiating the games,
- accepting the official assignments from the sports authorities,
- printing the official assignments,
- data validation and correction - After the above three steps, the data will be scrutinized in coordination with the relevant technical committees and secretaries of the various authorities, if any,
- updating of scores results and statistics

Scores - The scores of each event within each sport will be available as soon as that event is completed.

In case of Athletics (track events only) and Swimming the results will be obtained from the timing device by interlocuting them. The results obtained in all games will be done in an automatic fashion. Hence the results will reflect the current position of the Games at any point of time.

Scoreboard & Timing Devices

This module will interface with the scoreboard computer to display the score and other relevant information on the scoreboard. The system will also interface with the measuring or timing devices to record the timings (in case of track events of Athletics and various events of swimming).

The measuring or timing devices connected to the scoreboard computer will be transmitting the scores as soon as they are captured.

Scoring list information will be supplied before an event or a match begins. The data entry operator using the scoreboard interface subsystem functions will transmit the required data.

The transmitted data can then be preserved on scoreboard computer system. It can either be used as is or merged with the data received from timing or measuring devices. The information presented as start list will be used before the start of the event.

Web Interface

The web-based interface will be provided in the Games management system.

The web users can view the following:

- About Commonwealth Games
- Information on Participating countries
- Sport specific information
- Athletes’ information
- Sports Schedules
- Events
- Results
- Medal tables
- Current records
- News
- Hyper links to various sites identified by the Organising committee
- Information about the host country (Delhi, India)
- Information about important hotels
- Information about Government and Organising Committees
- Tourism information

There will also be a newsletter on board.

Additional Support

Apart from the Games related information, general information like banks, hotels, flight schedules etc., will also be provided. Also media centres will be maintained to help the media persons in case of necessity.

Games Village Management (Accommodation)

This module will provide information on the data pertaining to Accommodation and Transport made available during the Games.

Accommodation (Hospitality)

The computerized Games Village or Accommodation management system involves certain activities before the start of the actual Games and some activities during and after the Games.
Checkout forms will be automatically generated for participants who have checked-in. These forms will be kept ready for the participants at the time of checkout. This will enable the participants to collect their respective checkout forms during checkout and thus aid checkout formalities.

Information regarding participants staying in places other than the Games Village will also be collected and entered into the system at the end of the day. This will ensure the whereabouts of the participants’ place of stay during the Games and also his check-in-check-out status.

The computerized games village system will also facilitate any queries or reports on the status of the participants stay at different places.

Transportation
Transportation plan will cover venues that may be the places of interest to different category of persons. Different routes can be defined to cover places of interest.

Transportation arrangements are to be linked to these routes. These routes shall have distinct numbers and the starting, ending and intermediate stop points. Besides, each route will cater to a category of persons.

Different types and number of vehicles will be allotted to these routes depending on the volume of traffic and the category of persons to be mobilized on these routes.

To make identification of vehicles on routes easier, each vehicle will be given a distinct number, and colour coding.

System provides an interface for querying and giving reports on the status of different operations.

Miscellaneous

VIP/Security support

The schedules (departure and arrival timings) of VIPs for all the events throughout the Games will be maintained by CMS. With the help of this the Organizing Committee will be able assign personnel and volunteers for these tasks. This will facilitate the VIP protocols & security requirement.

Medical/Healthcare/Anti-Doping

CMS will maintain details of health care facilities available for the participants. This will maintain list of Clinics, hospitals, first aid centers, dispensaries and emergency medical aid contact points. It can maintain a log of services used by various participants.
Communications

QA

Describe comprehensively the services to be provided to the Media and Broadcast Rights and non-rights holders. At a minimum, the following aspects of the solution must be described:

1. Press and Main Press Centre
   - MPC location / proximity to major venues
   - MPC facilities and services
   - Venue broadcast centers - locations and services
   - Media transportation services
   - Media accommodation and food/catering services
   - Access and accreditation
2. Broadcasters and International Broadcast Centre
   - IBC location
   - IBC facilities and services
   - Venue broadcast locations and services
   - Access and accreditation
3. Photographers
   - Overall plans for photographers
   - Access and accreditation
   - Photographic positions allocated within each venue.

Describe the mixed-zone enforcement protocol that will be offered during the Games (media, rights-holders, non-rights holders, photographers, etc.)

The Bid Committee realizes the extremely important role played by the Media and especially the technical back-up required for the same. As such emphasis has been placed on providing a high-quality working environment, access to the latest technologies and a highly dedicated support service of the highest caliber and quality.

IBC and Main Press Centre

Both the facilities will be set-up at one venue - the Pragati Maidan complex. Located in the City Centre, the venue offers hotel accommodation of all budgetary types within 5 minutes driving time. Food and refreshment services can be made available round-the-clock at the several facilities that the venue already boasts of.

Pragati Maidan is less than 10 minutes from the location of the proposed Games Village, apart from being just 10-15 minutes away from all the major sporting venues.

The complex also boasts of two theaters - one indoor and one outdoor, several restaurants, party places, conference halls, and ample parking.

Venue Media Centres

Links to media centres at all major venues will be established and controlled from the Main Media Centre. Because most of Delhi's venues already host major events, a good deal of media-related infrastructure is already in place. All media centres at venues will be located within security accreditation areas.

Appropriate technology and equipment support will also be provided.

Transport

Following extensive research of transport requirements including a review of other major international events, a practical, efficient and workable solution will be offered.

Venue Broadcast/Photographer Locations

In preparation of specific venue plans, locations for media have been identified.

Accreditation

Compliance with CQF guidelines will be achieved.

Photographic Facilities

Appropriate accreditation and access to venues will be provided. No firm commitment has been made regarding the provision of film processing facilities within the main media centre due to the current move towards digital photography/imaging.
Transportation

1. Provide details of your existing transport infrastructure: motorways and major urban arterial routes, sub urban rail, subway and any light rail public transport.
2. For each of those indicate the size and capacity of each transport infrastructure both within the city to any outlying venues.
3. Indicate any additional transport infrastructure.

- Delhi has three airports, Indira Gandhi International Airport for international flights, Palam Airport for National flights and Sardarjung Airport for training for training purposes. It has three important railway stations, Delhi Junction, New Delhi Railway Station and Nizamuddin Railway Station. Delhi has three Inter-State Bus Terminals at Kashmere Gate, Sarai Kale Khan and Anand Vihar. About 31 lakh motor vehicles are registered in Delhi every year. Delhi has a number of flyovers and subways to decongest the traffic. Over 50 more flyovers will be constructed across the city by the year 2008.
- The Delhi Metro Rail has been planned as a backbone to the entire city's transportation system. Phase I, planned for completion by 2005 envisages a total length of nearly 65 km comprising of elevated, underground and ground level access. Phase II, planned to finish by 2010 will see the length increase to over 110 kms covering the entire city.
- For arriving at an ideal solution for the transportation arrangements, the Bid Committee looked at a wide range of options.
- The ground transportation needs of various groups as identified will be satisfied.
- In addition, all accredited Athletes, Officials etc. can avail the Public Transport Network, free of cost, based on their ID Cards.

---

Modes Of Transport

Delhi is predominantly dependent on road transport, with the railways covering only about 1% of the total traffic. Buses cover 62% of the total traffic load. Among personalized vehicles, motor cycles and scooters comprise about two third of the total number of vehicles in Delhi, while cars and jeeps account for one fourth of the total vehicles.

Road Network

The road network in Delhi spans 25,489 kms (including 337 Kms of NHs) as of March 1997. Delhi had 1,740 km of road length per 100 sq. kms area in 1956-97 compared to the national average of 73 km per 100 sq. km area (1995-96).

Fly-overs & Development

For a city dependent upon the Road Network, Flyovers are an integral part of the city's skyline. Just prior to the Asian Games, 1982, as many as 13 flyovers came up in no time at all. The Delhi Government's various agencies plan to come-up with 50 more flyovers by the year 2008. These will ease the flow of traffic tremendously.

The Ring Road. Delhi's most important roadway, will become an expressway without any need for traffic to halt at crossings. However, there is also a move to develop more green areas enhance the concept of landscaping near flyover, increase parking spaces introduce the concept of park and ride systems, pedestrianization of civic centers, and above all, bring the public transport system to world standards.

Delhi Transport Corporation

The Delhi Transport Corporation (DTC) is today the largest fleet of eco-friendly CNG buses in the world. Forming the basis of the Public Transportation system, the DTC's buses are modern & new with trained professional drivers.

Rail Network

Delhi is a major junction on the rail map of India linked to all Metropolitan cities directly. There are four major railway stations at New Delhi, Old Delhi, Hazrat Nizamuddin and Sarai Rohilla beside a Container Depot at Tughlakabad. There are 8 rail corridors in the Nation Capital Territory, which bring in more than 350 passenger trains and 40 goods trains each day.
Transportation

Transportation for Games

Reception to participants and other dignitaries would be according to the Indian tradition. Battery operated buses will ply round the clock for athletes, for transfer from Games Village to competition sites and in between site transfers. The CGF and other important members will each be provided with a car and chauffeur free of cost, for easy movement. One lane will be reserved for participants and officials on all major roads for easy accessibility.

</table>
The Delhi Metro Rail Project is one of the most eco-friendly projects using the latest available state-of-the-art technologies in use across the world. Envisaged as a Mass Rapid Transport System (MRTS), it will form the backbone of the city's transportation.

The first phase which is envisaged to be completed by 2005, plans for 62.16 km of network with 53 stations across the route. Capable of a capacity of 21.8 million passenger trips in 2005, the system can run trains at 2 minute intervals.

The inaugural section was inaugurated by the Prime Minister on December 24, 2002 and currently, the trains are being run at an interval of 5-8 minutes.

As on date, almost 50% of the total work has been completed at an estimated cost of nearly Rs. 4,1 billion.

The main features of the Delhi Metro are: • State-of-the-art air conditioned coaches • Automatic fare collection system • Smart cards for passengers • Modern adequate escalators at all Metro Stations.

In fact, by 2010, even the Phase II of the Delhi Metro would be completed. By the end of this Phase, the Metro Rail Network will be in excess of 110 km - covering the entire city of Delhi.
Confirmation

Please confirm that you will invite to the Games participants of all countries affiliated to the Federation and ensure:

I. That their entrance to your country shall be freely granted.
II. That they will be allowed to take part in the Games without any discrimination on the grounds of race, colour, religion or politics.
III. Please list any special laws, customs or regulations in your country that should be drawn to the attention of those attending and indicate whether and to what extent such laws, customs or regulations would limit, restrict, or interfere with the Games in any way.

Your attention is drawn to the CGF Games Management Protocols and Regulations which specify minimum requirements to be met by the Organising Committee in a number of areas including the Games Village, Media, Marketing and Accreditation.

△ As per the CGF Constitution, all accredited participants and officials will have free entry to Delhi for participating in the 2020 Commonwealth Games.
△ No difficulties are anticipated regarding entry into India or participation in events by athletes and team officials.
△ There are no special laws, customs or regulations that will have a negative impact on the Games.

Entry into India & Participation

All athletes registered in teams administered by the Commonwealth Games Associations of all the countries affiliated with the CGF shall be granted entry to the country.

△ In case of accredited participants & officials, Identity Cards will replace the entry Visa into India.
△ India will have the right of refusal to known criminals, terrorists, political activists etc.
△ Participation in the Games without any discrimination on the grounds of race, colour, religion or politics can be assured.

Special Laws, Customs and Regulations

Currently there are no special laws, customs or regulations etc. existing, and neither are they envisaged, that could have a negative impact on the Games in any way. India, as with so many other countries has particular restrictive regulations on the import/export of animal, its products, plant material or their derivatives, food, protected wildlife, drugs, medication, medicine, currency, firearms, weapons and ammunition. These regulations are policed and enforced at entry points.

For import/export of equipment directly associated with events of the Games, e.g., bicycles, javelins, hockey sticks, firearms etc. It is confirmed that special procedures will be put into place.

Minimum Guarantees

As indicated earlier and also undertaken at various points in this Bid Document, compliance with the CGF Constitution, Games Management Protocols, Host City Contract and minimum requirements are assured.
Finance

1. Proposed Budget, please provide details of how the Games will be funded and specifically your: 
   - Projected Expenditure & Capital costs with details
   - Operating costs with details
   - Sources of Income

2. How will your Games budget be financed, what commitments financial or otherwise do you have from your National, Regional or Local Government?

3. What arrangements have been agreed to ensure that the Marketing efforts of the C&OC and the OC will be coordinated to prevent conflict of Sponsorship and the marketplace?

4. What local laws are available to protect the market related rights from unauthorized usage?

- The Games operational plan has been based on the relevant data and study conducted by M/s A. Sharma & Company, Financial Consultants with the information obtained from last Commonwealth Games and International Sporting events held in Delhi.
- The Organizing Committee incorporates a commitment from the Ministry of Youth Affairs & Sports, Government of India and Government of NCT of Delhi that new venues (two Indoor and one Outdoor stadiums) will be complete by 2007.
- Projected expenditure for the Games has been divided into four broad parts.
- Capital expenditure is estimated for construction of new stadium, for adding additional facilities at the existing facilities, construction of Games village and purchase of technical equipments for Games.
- It is planned to have three new stadiums. Two Indoor stadiums with 4,000 capacity each for Weightlifting and Wrestling and a stadium with 2,000 capacity for Lawn Bowls are proposed to be built. The State Government shall provide land for these stadiums free of cost.
- For construction of Games Village land measuring 100 acres has been identified and the conceptual design has been developed. It is proposed that except the Hostel block (2,000 beds) the rest will be sold in the market and the Hostel Block will be used for accommodation of Players.
- The city of Delhi already has the following stadium
  - Jawaharlal Nehru Stadium for Athletics
  - Maj. D.C. National Stadium for Hockey
  - India Gandhi Indoor Stadium for Table Tennis and Gymnastics

- Yonuma Velodrome for Cycling
- Ambibazar Stadium for Rugby 7s
- Shivali Stadium for Hockey
- Siri Fort Sports Complex for Squash & Badminton
- Dr. S.P. Mukherjee Swimming Complex for Aquatics
- Dr. Kanti Singh Shooting Range for Shooting
- Tashkot Indoor Stadium for Netball

These existing stadiums shall not only be renovated but additional facilities shall also be provided to make them perfectly suitable for the Games. Renovation will include repairs of building, halls, furniture, fixtures and fittings.

- The Ministry of Home Affairs and the Government of National Capital Territory of Delhi shall provide additional security. Ministry of Health and CGHS shall provide medical facilities, fire services, traffic services, and additional services at customs and immigration. Additional efforts shall be made by the State Government to beautify the city. The flyovers, parks and other infrastructure shall be upgraded in addition to what has already been envisaged in the Master Development Plan for the city.
- For conducting the Games, the Central Government shall provide the necessary grants. It is expected that on completion, the Games are going to generate surplus.

- Projected expenditure has been estimated based on the past experience and recent estimates taken from various agencies. Suitable provision has been made to take care of contingencies and inflation.

- The expenditure on the Games shall also have a lot of indirect benefits. These will go a long way inculcating sports habits in the youth, especially when they would be involved with the event happening in their city itself. Development of tourism, employment generation, additional infrastructure are some other indirect benefits which would be coming from the Games for not only the residents of Delhi but for all sports enthusiasts in the country.

- It is proposed to implement all the marketing rights through the Organizing Committee. This Committee shall have representation of IOA/OC/GF and therefore there would be no conflict of Sponsorship in market place between IOA and OC.

- India in recognition of the importance of protection intellectual property rights (IPRs) has taken effective measures by enacting tough legislation in this field and also by amending the existing Laws. These Laws have equitable efficacy for protection of IPRs as in any other developed country. IPRs are regulated and protected in India under the following:
  - The Design Act 1911
  - Trademark Act 1944
  - Copyright Act 1957
  - Information & Technology Act, 2002.

Under the provision of these enactments Market rights shall be fully protected from the unauthorized use.

**Finance**

The Organising Committee confirms that on award of the Games, the Indian Olympic Association (IOA) in accordance with clause 7 of the Invitation to Bid, undertakes to execute a contract that binds the Organising Committee to all aspects of the Bid Document. Your attention is drawn particularly to the commitments of an OIC, contained in Protocols 2, 9, 10, 11, 13, 14, 18.

**QA**

- **Protocol 2**: Duties of the Commonwealth Games Association of the Host Country and of the Organising Committee.
- **Protocol 8**: Cultural Programme
- **Protocol 9**: Travelling Expenses
- **Protocol 10**: The Commonwealth Games Village
- **Protocol 11**: Transport
- **Protocol 13**: Arrangement for the Federation in the Host City
- **Protocol 14**: Medical
- **Protocol 18**: International Delegation / Observer
International TV and Broadcast Rights

1. As stated within the Constitution, International broadcast rights including those for TV and Radio and those for television, radio archives, are reserved under the sole jurisdiction of the CCF. You are urged to undertake early discussions with the CCF on this and in particular the provisions of Article 27 of the Constitution with respect to commercial rights associated with the Games.

2. Please indicate if there are domestic issues, which should be considered by the CCF (e.g., political, economic or technical) in the negotiation of International broadcast rights.

The International TV and broadcast rights have been reserved as the sole jurisdiction of the Commonwealth Games Federation.

With respect to the co-ordinated and effective marketing of the Games, the Organizing Committee will seek to enter a commercial partnership with the International broadcast rights holder.
There Will Be More To

The 2010 Commonwealth Games
Than Meets To Eye
The invitation to Bid and the Questionnaire (revised as sent) do not contain specific questions related to several crucial issues of the holding of the Commonwealth Games. These issues are key issues as the Commonwealth Games Family places great importance on them.

Also, these issues are among the most colourful, lively and vibrant aspects of the staging of the Games.

- The Delhi 2010 Commonwealth Games Bid Committee has accorded a very high level of importance to these issues and accordingly has dealt with the same in detail.
- Principally the issues that have been detailed are:
  - Ceremonies
  - Queen's Baton Relay

Ceremonies

Ceremonies have been planned as an admixture of ritualistic mandatory items laid down by the Commonwealth Games Federation, and the cultural & pageantry shows which will supplement and will be interwoven with the hard core of mandatory items and also enable India to project its rich, varied and colourful cultural heritage.

Conduct of the Ceremonies

The conduct of the Ceremonies will be divided into the following parts:

- a) Flag Raising and Flag Lowering Ceremonies at the Games Village
- b) The Opening Ceremony
- c) Victory Ceremonies

Flag Raising & Lowering Ceremony

The Ceremonial Committee will assist the Games Village Mayor and the Administration of the Commonwealth Games Village in the Ceremonial hoisting of the flags of the countries participating in the Delhi 2010 Commonwealth Games. The Flag Raising Ceremony will be carried out at the Square of Nations for each participating contingent individually, in the presence of Mayor of the Village and the Chef de Mission and selected members of the contingent. After an appropriate speech of welcome, the National Anthems of the concerned country will be played and its flag will be raised ceremoniously. The Flag Raising Ceremony for the host country, India, will be carried out last. In all cases the tape recorded band music of National Anthems received from the participating countries will be played.

The Flag Lowering Ceremony will be carried out on the evening of 3rd November, 2010 after which the Village will be officially declared closed. In a brief but colourful ceremony at the Square of Nations in the presence of Cabinet Minister and other dignitaries including the Ambassadors of the countries concerned, flags of all the participating nations will be lowered at sunset, to the accompaniment of the bugle call "Retreat".

Opening Ceremony

The cultural programme will commence as soon as the arena is emptied. Colourfully decorated elephants in traditional attire, 33 in number, with the tallest in the Centre and the shorter ones on either side in descending order will be the opening spectacle to the Ceremony being envisaged. They will be bedecked with golden ornaments on their foreheads & trunks and draped colourfully. The attendants will be on the elephants’ backs holding feathers and fly whisks, which they will wave to the accompaniment of music, which is a traditional routine with ceremonial elephants. As a very special gesture, the ritual of changing of the colourful umbrellas carried on top of the elephants. These magnificent and disciplined animals, will form a most dramatic and picturesque backdrop for the glittering Opening spectacle of the cultural events.

Laser shows, fireworks and performances by the country’s leading artists will all be part of the Opening Ceremony.
Victory Ceremonies

Victory Ceremonies will be conducted at the end of each competition at the respective venues. A pool of 10 Victory Ceremony Teams will be provided for these ceremonies to cover all the Games. This pool of 10 teams will function under a senior officer who will be designated as Chief Coordinator. Each Team will be headed by a Coordinator. Victory Ceremonies will be assisted by two officers - one for coordination and liaison with other agencies, and other for marshalling and escorting the Medal winners and the Maids of Honour to the Victory stand and back. Two officers and eight volunteers will be provided for handling Victory stand, hoisting flags and other such field tasks. Four to six Maids of Honour, attired in traditional dresses of the different regions of India will form part of each of these teams for carrying the medals. These Maids of Honour will rotate so as to give maximum exposure to the variety of ceremonial dresses and thereby worn in different parts of our country.

A pool of 10 Teams will be created to effect a saving in manpower and to achieve flexibility of deployment.

Queen’s Baton Relay

The Bid Committee realizes the importance of the Queen’s Baton Relay. It is to the Commonwealth what the Torch is to the Olympics. The Relay will be an integral part of the Opening Ceremony events.

Requirements as set out in Article 27 of The CGF Constitution, and Protocol 25 of the CGF’s Games Management Protocols, and item 1.2 of the revised Host City Contract will be complied to.

Taking The Games To The People

A point-to-point relay traveling from England, across many member nations and finally arriving at the host nation - this has been a long tradition of the Commonwealth Games and the Queen’s Baton Relay. The Relay serves to announce the Games as well as relay the hype surrounding it. Not only this, it serves to establish stronger links between the Commonwealth nations. The Relay will offer an unique opportunity to all Indians to be a part of the event through direct or indirect participation in the activities of the Relay. The Relay will also give an opportunity to the Organising Committee to launch a highly effective and high decibel level pre-publicity campaign.

A Format That’ll Involve Most Indians

A specific relay format has been adopted for the Relay. Runners who carry the Queen’s Baton will come from all walks of life and will not be athletes. This event will provide an opportunity for the entire country to get involved in the Relay and the forthcoming Games.

Key components of the Relay are as follows : 1) Baton Relay: an event by which the Baton travels from one city to another along a specified route until it arrives in Delhi.

2) Capital City Reception: an event where the Baton is received into a capital city and where the city uses its resources to stage an associated event and a civic reception.

Suggested Relay Route

The Relay Route has been designed to ensure that the Queen’s Baton is taken across the huge vastness that the country of India is. This will ensure that the maximum number of Indians get an opportunity to experience this ‘once-in-a-lifetime event’ and carry the message of Queen Elizabeth II.

The Route suggested will touch the four directional points of the country - East, West, North and South apart from traveling all major metropolises as well as sports-loving cities.
